Looking Back And Thinking Forward Reexaminations Of Teaching And Schooling:

Looking Back and Thinking Forward Lillian Weber, 1997 This book is a forward looking rather than retrospective collection of the influential writings of Lillian Weber These essays many of which are being published here for the first time represent the mature thinking of a progressive educator who after 20 years of teaching young children initiated dramatic changes in the public schools of New York City This important text reclaims the importance of teachers being seen by themselves and by others as intelligent capable central and committed to children s growth confronts the issue of equity for minority students and shows how it can be interpreted in the approach both to curriculum and to the school s role in the community probes the meaning of educating all children and of what education should be in a democracy looks at the school teachers parents and community as elements of the ecology of the child s educative experience and offers an original approach to the question of morality in education

Starting Strong Patricia F. Carini, 2001 In an elegant affirmation of human capacity and creativity Patricia Carini counters high stakes testing the pathologizing of children and the unrelenting critique of the public schools with a persuasive account of how children all children actively make sense of the world and their experience through the making of works such as drawings constructions and writings This engaging and vivid account of the day to day possibilities of learning and teaching and ultimately the remaking of the schools is indispensable reading for anyone called to teach or committed to a liberating education for all children This is a beautifully written book I am inspired with each page Vito Perrone Harvard University In this precious book by one of our most powerful thinkers Pat Carini takes us deep deep into the lives of children into classrooms and schools into the human heart of education at its best William Ayers University of Illinois at Chicago A thoughtful book that challenges us to embrace an expansive vision of education Throughout this powerful collection of essays Pat Carini reminds us to place the value of each individual at the center of all we do in schools Judy Buchanan National Writing Project In this book Carini draws on children s and teachers stories poetry and philosophy as she attends to making visible for the reader the humanness of education Ofelia Garc a Dean School of Education Long Island University

Praise for the first edition of *Teaching the Taboo*
For those frustrated by the thrust of educational reform, this book provides what can be described as both a challenge and a set of alternatives.
Education Review
Drawing from a lifetime of deep thinking about education and courageous commitment to precious students, Rick and William Ayers have given us a marvelous book. Their devastating critique of the pervasive market models in education and their powerful defense of democratic forms of imagination in schools are so badly needed in our present-day crisis.
Cornel West, Princeton University
Teaching the Taboo is provocative, challenging, funny in places, wild but sensible enough to be useful, inspiring and practical for educators who are working to negate the educational madness that is infecting the schools.
Herb Kohl, author of *36 Children* and *Painting Chinese*
Rick Ayers is a university instructor and founder of the Communication Arts and Sciences small school at Berkeley High School and teaches at the University of San Francisco.
William Ayers is a school reform activist and a Distinguished Professor of Education and Senior University Scholar at the University of Illinois at Chicago.

Because Teaching Matters Marleen C. Pugach, 2009-01-06
Real challenges, Real choices, And very real consequences. That's what today's classrooms are about. That's why Marleen Pugach's *Because Teaching Matters: An Introduction to the Profession* 2e is all about depicting today's classrooms as they truly are while at the same time highlighting the enormous impact teachers have on students' lives. Organized around five professional commitments: from learning from multiple sources of knowledge, using the curriculum responsibly, and embracing diversity to meeting the needs of individual students and contributing actively to the profession. *Because Teaching Matters: An Introduction to the Profession* 2e tells the true story of today's complex classrooms. But there's more. It also drives home that though the decision to teach is a serious one, it is one that can be extremely rewarding. Current research, practical discussions, and realistic cases capture the breadth and depth of the modern teaching experience while a warm, engaging writing style makes the text a pleasure to read. Ideal for Foundations of Education and Introduction to Teaching courses designed to provide preservice teachers with an overview of the profession.

From Another Angle Margaret Himley, Patricia F. Carini, 2000-03
This volume represents the first effort to present and teach the descriptive processes, philosophy, and values developed at the Prospect Archives and Center for Education and Research in North Bennington, Vermont. Through story and essay, it introduces a disciplined, collaborative method for understanding children as thinkers and learners, called the descriptive review of the child. Developed through the Prospect Center under the leadership of Patricia F. Carini, the descriptive review is a mode of inquiry that draws on the rich, detailed knowledge teachers and parents have of children and on their ability to describe those children in full and balanced ways so that they become visible as complex persons with

Those Who Dared Carl Glickman,2009 For decades practically every major initiative in American education from top down standards to the testing movement has moved decision making farther away from the school Fighting against this trend throughout their careers Deborah Meier John Goodlad James Comer Ted Sizer and Henry Levin have worked to give our schools back the ability to educate students in the broadest and richest traditions of activity inquiry and problem solving Now these visionary educators have joined together to share personal stories of the challenges and triumphs they faced and their ideas of what education can and must be for every student Serving as an inspirational call to action for those seeking to be more involved in the urgent and continuing efforts to restore America s public schools this book Brings together the experiences and insights of greatly influential and progressive educational leaders of the past half century and they are still working today Ranges from highly personal to imminently practical to passionately political with each writer offering a unique perspective on what it takes to sustain major school change Recounts the many instances when the authors thought beyond the conventional boundaries of educational practice to find innovative solutions in a number of critical areas including developing more effective curriculum and assessment expanding the benefits of gifted education to every child strengthening school community partnerships and addressing the specific needs of small schools and learning communities
