Abstract: The frequency and quality of intergroup contact within racially and ethnically diverse schools has potentially important implications for the achievement of desegregation goals. The analyses presented here use survey data to assess intergroup contact within a sample of ten interdistrict magnet schools in Connecticut. Findings indicate frequent intergroup interactions within interdistrict magnet schools, but also that the perceived quality of intergroup relations differs across racial groups and both the frequency and quality of intergroup contact varies considerably across schools. Students who report higher quality intergroup relations in their school also tend to report more positive academic environments and more positive attitudes towards other groups.

and institutions use diversity and inclusion mantras to signal opportunity and access for all. However, the real world results are often underwhelming and people are demanding that organizations recognize the value that diversity brings to a workplace and be held accountable to the diversity and inclusion mission statements on their websites. The Rowman Littlefield Handbook on Workplace Diversity and Stratification provides a comprehensive yet concise overview of important issues, themes, and research regarding workplace diversity and stratification. The book analyzes present day and future implications of diversity in the workplace and offers concrete ways of developing policies and practices that will make diversity an intrinsic part of any organizational culture. Taking an interdisciplinary approach, the book covers topics including racism, sexism, socio-economic status, LGBTQ workers, education, intersectionality, neurodiversity, religion, and allyship. Practical, contemporary, and relevant, this is an excellent resource for anyone interested in understanding what workplace diversity and stratification mean for everyday people, institutions, and society as a whole.

Housing Desegregation and Federal Policy

John M. Goering, 2012-12-30. Housing desegregation is one of America's last civil rights frontiers. Drawing on the expertise of social scientists, civil rights attorneys, and policy analysts, these original essays present the first comprehensive examination of housing integration and federal policy covering the last two decades. This collection examines the ambiguities of federal fair housing law, the shifting attitudes of white and black Americans toward housing integration, the debate over racial quotas in housing, and the efficacy of federal programs. Title VI of the Civil Rights Act of 1964 banned discrimination in federally assisted housing, and Title VIII of the Civil Rights Act of 1968 banned discrimination in most of the private housing market. Housing Desegregation and Federal Policy shows that America has made only modest progress in desegregating housing despite these federal policies. Providing a balanced assessment of federal policies and programs is complicated because of disagreement over the nature of the federal government's role in this area. Disagreements over the meaning of federal law, coupled with white and black disinterest in desegregation, have compounded the difficulties in promoting residential integration. The authors employ research findings as well as legal and policy analysis in examining these complex issues. They consider a broad range of issues related to housing desegregation and integration, offering new sources of evidence and ideas for future research and policymaking.
