starting with a robust onboarding process and continuing through a staff member's entire duration at an institution. Because library services and resources can change rapidly, ongoing training is an important aspect of library operations. Training can be a particular challenge at large multi-branch library systems because it can be difficult to ensure all staff are able to receive the relevant information. Written for library managers and training leaders, *A Complete Guide to Training Library Staff* presents a comprehensive lifecycle for staff development with a focus on tools and techniques to build a sustainable training program, set staff up for success in their positions, and develop a positive and supportive community across the library. Authors Emily Leachman and A Garrison Libby spearheaded their library's movement to largely online trainings which are inclusive of staff at all branch locations. This practical guidebook helps managers and trainers develop a comprehensive plan that allows new staff to quickly become acquainted with the operations of the library, provides ongoing training to make staff aware of new procedures and services, and creates a collaborative and supportive training environment to empower staff to learn and lead. *Routledge Library Editions: Education Mini-Set B: Curriculum Theory 15 vol set* Various, 2021-12-02. Reissuing works originally published between 1975 and 1997, this collection includes books covering all aspects of managing schools from primary to further education. With an international selection of authors, some volumes present case studies while others address wider areas of concern in the management of educational institutions. Individual volumes concern special schools and specific types such as the grant-maintained system in the UK. Topics cross over from finance to staff development to politics and governance to innovation. This is an excellent varied set for any education management bookshelf. *Instructor*, 1967. *School Library Makerspaces in Action* Heather Moorefield-Lang, 2018-03-05. Maker learning spaces in schools and public libraries are made real through the narratives of professional librarians around the world, comprising the collaborative activities, experiences, and perspectives of librarians as they have implemented makerspaces for students of all ages. *School Library Makerspaces in Action* is for any librarian looking for inspiration for their own makerspaces, hackerspaces, fablabs, or DIY locations, and how to use these spaces in libraries and educational settings. Contributions from authors around the world address the needs of most all readers, including how to provide the staff training necessary for a successful makerspace. Each chapter is written from an author's personal experience and with only a little fine-tuning and imagination, many of these ideas can be used throughout all levels, disciplines, and subjects in K-12 education and carry over into higher education. The successes and optimism shared in this collection will inspire librarians and educators to think positively about how to
