Rethinking Careers Education and Guidance Ruth Hawthorn, Jennifer M. Kidd, John Killeen, Bill Law, A. G. Watts, 2002-11 This is the first book to cover theory policy and practice in all sectors of careers education and guidance provision It is an essential text for students in initial training those engaged in in service and higher degree work *Career Development as a Partner in Nation Building Australia* Wendy Patton, 2019-07-15 Despite examples of vocational guidance practice being evident in Australia since the mid 1800s there remains a spasmodic and patchwork approach to practice across the country For decades it is a field which has been paradoxically boosted and challenged by changing economic and political agendas Repeated international national and State reviews emphasise the vital nature of a systemic national approach to career development however authors repeatedly lament the lack of a sustained focus on career activity as a major national priority There is no broad comprehensive historical reckoning of the history of career development theory and practice in Australia since this early period Career development theory and practice in Australia has been forged in partnership with developments in an international context In documenting the shared history with other countries the author significantly adds to the body of knowledge on career development as a field in Australia and internationally The book provides new understandings about the historical development of this field of knowledge and in particular the challenging and cyclical nature of its policy history *The Oxford Handbook of Career Development* Peter J. Robertson, Tristram Hooley, Phil McCash, 2021 Abstract The handbook seeks to provide a state of the art reference point for the field of career development It

engages in a trans disciplinary and international dialogue that explores current ideas and debates from a variety of viewpoints including socio economic political educational and social justice perspectives Career development is broadly defined to encompass both individuals experience of their own careers and the full range of support services for career planning and transitions The handbook is divided into three sections The first section explores the economic educational and public policy contexts within which careers are enacted The second section explores the rich conceptual landscape of career theory The third section addresses the broad spectrum of helping practices to support both individuals and groups including career guidance career counseling and career learning interventions Keywords Career career development career counseling career guidance career learning career theory public policy social justice
