Harrison, 2010-07-20 In most areas of Sub Saharan Africa it is expensive dangerous and unsafe to give birth especially when pregnancy is complicated by life threatening conditions Safe caesarean section has a key role to play in making childbearing safer but it costs around 300 or more and in a continent where most people live on less than 1 per day this is simply unaffordable to most households Worse still many cannot afford even the user fees charged Additionally the public healthcare systems are run down and understaffed often with demoralised underpaid and poorly motivated workers who often have to moonlight in order to supplement their wages Poverty and inadequacies in existing healthcare services and public utilities are however not the only factors undermining safe motherhood in Africa Governance structures are also weak and life for most people is harsh and chaotic Religious doctrines harmful cultural beliefs and lack of education often reinforce women's inferior status and the neglect that follows especially during pregnancy labour and puerperium combine to produce the appalling health statistics common in Sub Saharan Africa today For instance maternal deaths per 100 000 deliveries are close to 900 and for every 1000 children born 100 die during the first week and 130 weigh less than 2.5 kg at birth Kelsey Harrison worked and researched on these issues for close to four decades and during that period published extensively in many of the most highly regarded peer reviewed journals in medicine This book is a selection of some of his publications in such journals as The Lancet British Journal of Obstetrics and Gynaecology British Medical

Journal Clinical Science and Journal of the Royal Society of Medicine between 1966 and 2010 Included in this volume is the groundbreaking Zaria Maternity Survey which he initiated and whose results and recommendations are now being gradually accepted globally as the model for enhancing maternal health in Sub Saharan Africa

Trends in Midwifery Research

Randell E. Balin,2005 Midwifery is used to describe a number of different types of health practitioners other than doctors who provide prenatal care to expecting mothers attend the birth of the infant and provide postnatal care to the mother and infant Nurse midwives also provide gynaecological care to women of all ages Practitioners of midwifery are known as midwives a term used in reference to both women and men the term means with the woman Most are independent practitioners who work with obstetricians when the need arises They usually deal with normal births only but are trained to recognise and deal with deviation from the norm If something abnormal is discovered during prenatal care the client is sent to an obstetrician Other midwives will deal with abnormal births including breech birth There are two main divisions of modern midwifery in the United States nurse midwives and direct entry midwives In the United Kingdom midwives are practitioners in their own right and take responsibility for the antenatal intrapartum and immediate postnatal care of women In many parts of the world midwives delivery far more children than doctors This new book brings together the latest research on this ever changing field

The Politics of Maternity

Rosemary Mander,Jo Murphy-Lawless,2013-04-12 The evidence surrounding the skills and approaches to support good birth has grown exponentially over the last two decades but so too have the obstacles facing women and midwives who strive to achieve good birth This new book critically explores the complex issues surrounding contemporary childbirth practices in a climate which is ever more medicalised amidst greater insecurity at broad social and political levels The authors offer a rigorous and thought provoking analysis of current clinical managerial and policy making environments and how they have prevented sustaining the kind of progress we need The Politics of Maternity explores the most hopeful developments such as the abundant evidence for one to one care for women and sets these accounts against the background of changes in health service organisation and provision that block these approaches from becoming an everyday occurrence for women giving birth The book sets out the case for renewed attention to the politics of childbirth and what this politics must entail if we are to give birth back to women Designed to help

professionals cope with the transition from education to the reality of the system within which they learn and practise this inspiring book will help to assist them to function and care effectively in a changing health care environment

Myles' Textbook for Midwives E-Book Jayne E. Marshall, Maureen D. Raynor, 2014-09-05 The most popular midwifery textbook in the world The sixteenth edition of this seminal textbook Myles Textbook for Midwives has been extensively revised and restructured to ensure that it reflects current midwifery practice with an increased focus on topics that are fundamental to midwifery practice today Well illustrated to assist visual learning Boxes highlighting significant information to aid study Introduction Aims of the chapter and Conclusion for each chapter References Further Reading and Useful websites to promote further learning Glossary of terms and acronyms provide simple definition of more complex terminologies Additional online resources Over 500 multiple choice questions enable students to test their knowledge Unlabelled illustrations help reinforce learning Full image bank of illustrations to make study more visual and assist with projects Full colour illustrations now used throughout the book in response to student feedback Contains many new chapters some of which are authored by members of the multi professional team Up to date guidance on professional regulation midwifery supervision legal and ethical issues risk management and clinical governance Recognition that midwives increasingly care for women with complex health needs in a multicultural society Examination of the dilemmas involved in caring for women with a raised body mass index Chapter on optimising care of the perineum for women with perineal trauma including those who have experienced female genital mutilation Guidance to support the trend for midwives to undertake the neonatal physical examination of the healthy term infant Additional coverage of basic neonatal resuscitation **Midwives' Tales** Lesley Barclay, 2005 The result of a ten year collaboration between Australian and Samoan researchers and midwives this book compiles the first person stories of several generations of Samoan midwives both those who use traditional

techniques for home birth and those who use Western techniques in a hospital The voices are vivid and varied often displaying the Samoan gift for storytelling The overall picture of changing birthing practices is complex and sometimes tinged with ironies As the introduction says These Samoan nurses and midwives did not immediately attempt to mediate new and old ways of birthing after the colonial leadership of their profession left They themselves became cultural agents for change as they continued the role of colonizing their own birth tradition and taught the fa atosaga Samoan for midwife Western techniques at the same time trying to provide a professional midwife for all women Paradoxically they often chose a social midwife for their own births and supported or at least condoned the social midwives close to them Kaisarina while working as the leading professional midwife in the country and working almost totally in hospital practice herself simultaneously assisted her mother in law with her social practice of midwifery Vipulo s story shows how a professional midwife preferred to have her mother a social midwife deliver her at home A particular objective of the authors is to encourage a reconception of maternity care in countries where professional services are rare and not available to all women The book challenges common assumptions still held in many postcolonial countries that a simple migration of Western style hospital focused care is necessarily always an achievable or desirable goal It also demonstrates the considerable progress that one group has made in rethinking and developing a model of maternity care that works within their society and culture As these midwives stories suggest solutions to some of the problems caused by gaps in the kinds of resources that Westerners take for granted can be found in partnerships and cultural wisdom that already exist in Samoa and by extension other developing countries
