Instruments for Climate Policy Johan Albrecht, 2002-01-01 This book will be invaluable both to researchers wanting to understand latest developments in theory and practice and to those in the policy process wishing to design and implement climate change policies using the flexibility mechanisms Frank Convery University College Dublin Ireland The Kyoto Protocol introduced international flexible mechanisms into climate policy and since then the design and most effective use of flexible instruments have become key areas for climate policy research *Instruments for Climate Policy* focuses on economic and political aspects related to the recent proposals and the debate on limits in flexibility and discusses EU and US perspectives on climate policy instruments and strategies *The Institutional Economics of Market-Based Climate Policy* E.

Woerdman, 2004-08-10 The objective of this book is to analyze the institutional barriers to implementing market based climate policy as well as to provide some opportunities to overcome them The approach is that of institutional economics with special emphasis on political transaction costs and path dependence Instead of rejecting the neoclassical approach this book uses it where fruitful and shows when and why it is necessary to employ a new or neo institutionalist approach The result is that equity is considered next to efficiency that the evolution and possible lock in of both formal and informal climate institutions are studied and that attention is paid to the politics and law of economic instruments for climate policy including some new empirical analyses The research topics of this book include the set up costs of a permit trading system the risk that credit trading becomes locked in the potential legal problem of grandfathering in terms of actional subsidies under WTO law or state aid under EC law and the changing attitudes of various European officials towards restricting the use of the Kyoto Mechanisms **On the Compatibility of Flexible Instruments** C.J. on the flexibility mechanisms of the Kyoto Protocol and summarises the main findings of a two day workshop on Dealing with Carbon Credits after Kyoto organised by ETC and the JIN foundation both from the Netherlands in Callantsoog the Netherlands on 28 29 May 1998 The workshop was one of the first meetings held on the flexibility mechanisms after the Kyoto Protocol had been accepted at the Third Conference of the Parties CoP3 in Kyoto Japan in December 1997 During the workshop it became clear that during the stage of translating the Protocol provisions on the flexibility mechanisms notably Articles 6 12 and 17 into concrete action there are still many questions on how to interpret the scope and meaning of the Protocol text precisely Indeed various issues need to be elaborated on before a full assessment of the future practical work the start of CDM and JI projects and possibly international emissions trading can be made Several issues were addressed at the workshop e g how and via which procedures to determine the net abatement of particular CDM/JI projects who is liable for non compliance in international emissions trading is there a need for credit sharing formulae can incentives be provided for early action etc *Compact and Flexible Microwave Devices* Dilip Kumar Choudhary, Indrasen Singh, Manoj Kumar
