and Matter John Urschel,Louisa Thomas,2020-05-12 A New York Times bestseller John Urschel mathematician and former offensive lineman for the Baltimore Ravens tells the story of a life balanced between two passions For John Urschel what began as an insatiable appetite for puzzles as a child developed into mastery of the elegant systems and rules of mathematics By the time he was thirteen Urschel was auditing a college level calculus course But when he joined his high school football team a new interest began to eclipse the thrill he felt in the classroom Football challenged Urschel in an entirely different way and he became addicted to the physical contact of the sport After he accepted a scholarship to play at Penn State his love of math was rekindled As a Nittany Lion he refused to sacrifice one passion for the other Against the odds Urschel found a way to manage his double life as a scholar and an athlete While he was an offensive lineman for the Baltimore Ravens he simultaneously pursued his PhD in mathematics at MIT Weaving together two separate narratives Urschel relives for us the most pivotal moments of his bifurcated life He explains why after Penn State was sanctioned for the acts of former coach Jerry Sandusky he declined offers from prestigious universities and refused to abandon his team He describes his parents different influences and their profound effect on him and he opens up about the correlation between football and CTE and the risks he took for the game he loves Equally at home discussing Georg Cantor s work on infinities and Bill Belichick s playbook Urschel reveals how each challenge whether on the field or in the classroom has brought him closer to understanding the two different halves of his own life and how reason and emotion the mind and the body are always working together So often people want to divide the world into two he observes Matter and energy Wave and particle Athlete and mathematician Why can t something or someone be both [The Geometry of Musical Rhythm](#) Godfried T.

Toussaint,2016-04-19 The Geometry of Musical Rhythm What Makes a Good Rhythm Good is the first book to provide a systematic and accessible computational geometric analysis of the musical rhythms of the world It explains how the study of the mathematical properties of musical rhythm generates common mathematical problems that arise in a variety of

seemingly disparate Mathematical Reasoning Raymond Nickerson, 2011-02-25 The development of mathematical competence both by humans as a species over millennia and by individuals over their lifetimes is a fascinating aspect of human cognition This book explores when and why the rudiments of mathematical capability first appeared among human beings what its fundamental concepts are and how and why it has grown into the richly branching complex of specialties that it is today It discusses whether the truths of mathematics are discoveries or inventions and what prompts the emergence of concepts that appear to be descriptive of nothing in human experience Also covered is the role of esthetics in mathematics What exactly are mathematicians seeing when they describe a mathematical entity as beautiful There is discussion of whether mathematical disability is distinguishable from a general cognitive deficit and whether the potential for mathematical reasoning is best developed through instruction This volume is unique in the vast range of psychological questions it covers as revealed in the work habits and products of numerous mathematicians It provides fascinating reading for researchers and students with an interest in cognition in general and mathematical cognition in particular Instructors of mathematics will also find the book's insights illuminating

Beauty and the Soul Piero Ferrucci, 2009-08-20 The bestselling author of *The Power of Kindness* shows how the ability to appreciate beauty far from being a luxury or an afterthought is vital to leading a happy balanced and satisfying life Beauty is all around us in a flower a song the sound of falling water or a dramatic painting We often think of it as just window dressing But it's not It is the balm of our existence and we cannot live full and satisfying lives without it Transpersonal psychologist Piero Ferrucci helps us to see everyday beauty in a whole new way and to understand its powers to guide us through periods of darkness or stress to speed recovery to make life feel purposeful He uses stories case studies clinical histories and anecdotes to explain how different kinds of beauty complement and complete our lives in different ways So much of the malaise and low grade depression we may find in our lives and those of people we love is due to our inability to understand the extraordinary power and necessity of taking time to smell the flowers Ferrucci shows how we can place ourselves in closer proximity to the therapeutic healing that only beauty can bring
