civilizations on their personal computers by joining the SETI Home project Today SETI researchers continue to see themselves as explorers They often identify with Columbus and just as Columbus never realized the full implications of his discovery we cannot predict what will happen if contact is made This book points out that if against all expectations the embattled SETI movement finally succeeds the long awaited first signal picked up by its radio antennas will usher the greatest shift in human history A new adventure will begin Lawrence Squeri is professor emeritus of history at East Stroudsburg University *Handbook to UFOs, Crop Circles, and Alien Encounters* Sean McCollum,2016-08 The idea that aliens might visit our planet has gripped Earthlings for a long time Extraterrestrials are popular in science fiction books movies and TV shows UFO hunters of every kind are searching Earth sky and space for answers to the question Are we alone in the galaxy **Habitable Exoplanets for Extra-terrestrials** Christopher R.
