Resources in Education, 2001-04 **Linking Children's Learning with Professional Learning** Jeanne K. Keay, Christine M. Lloyd, 2012-01-01 Producing evidence that professional development undertaken has an impact on children s learning is an increasingly important issue in education This book proposes a process model designed to support and enable education professionals to focus on this issue as an integral part of their daily work This model centres around the identification of professional learning needs in relation to the learning needs of children and focuses on evidence of impact as part of that process For this model to work effectively however there must be a culture which supports enables and recognises the value and importance of professional learning and development and which is inclusive and child centred This culture its elements and its development are also addressed and provide the context and underpinning for the model In the second part of the book research undertaken to develop and pilot the model with a range of education professionals is discussed and the model is further developed to support education practitioners leaders and professional development providers to ask questions that are specific to their roles and responsibilities This book will be of interest to a range of professionals teaching leading working studying and researching in compulsory and post compulsory education It also has relevance for the increasing number of providers of learning and development opportunities for education professionals

Masters Theses in the Pure and Applied Sciences Wade H. Shafer, 2012-12-06 Masters Theses in the Pure and Applied Sciences was first conceived published and disseminated by the Center for Information and Numerical Data Analysis

and Synthesis CINDAS at Purdue University in 1957 starting its coverage of theses with the academic year 1955. Beginning with Volume 13 the printing and dissemination phases of the activity were transferred to University Microfilms Xerox of Ann Arbor Michigan with the thought that such an arrangement would be more beneficial to the academic and general scientific and technical community. After five years of this joint undertaking we had concluded that it was in the interest of all concerned if the printing and distribution of the volumes were handled by an international publishing house to assure improved service and broader dissemination. Hence starting with Volume 18 Masters Theses in the Pure and Applied Sciences has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York and in the same year the coverage was broadened to include Canadian universities. All back issues can also be ordered from Plenum. We have reported in Volume 28 thesis year 1983 a total of 10 661 theses titles from 26 Canadian and 197 United States universities. We are sure that this broader base for these titles reported will greatly enhance the value of this important annual reference work. While Volume 28 reports theses submitted in 1983 on occasion certain universities do report theses submitted in previous years but not reported at the time.

Cost Effectiveness in Medical Education Kieran Walsh, 2021-04-05. With economic winter facing many healthcare and health education budgets the high costs of medical education are bringing it under close scrutiny. However the costs of not providing high quality medical education not least human costs in morbidity and mortality from medical error are also high presenting medical educators funding managers policy makers and economists with an unenviable dilemma. To add to their difficulties remarkably little has been written on cost effectiveness in medical education including how to calculate costs how to get maximal value for money and even what constitutes value for money. In this book the first of its kind world leading experts comprehensively outline what is known about cost effectiveness in each of their fields. Undergraduate postgraduate and continuing professional education are all explored as are e learning simulation cost benefit analysis and numerous other areas. Lecturers and researchers in medical education clinical tutors and educational supervisors and appraisers managers responsible for funding medical education and health economists and health policy makers and shapers will find this an invaluable resource. An excellent analysis and explanation of an under explored subject from the Foreword by Sir Liam Donaldson.

Continuing Professional Education in Australia Barrie Brennan, 2016-09-01. This book offers a history of Continuing Professional Development CPD in the Australian context. It presents an approach that links the development of CPD to a series of missed opportunities and the identification of three key themes: mandatory CPD, competencies and regulation, registration as well as with national regulation for select health professions. It not only relates the evolution of CPD in Australia but also serves as a guide to examining the situation in other countries and the emergence of CPD in individual professions. CPD has been provided for many decades but it has not been rated as a high priority or a key area of provision and has not been the focus of discussions or disputes in the higher education sector or in vocational education circles. Nevertheless in describing CPD's development evidence is presented that CPD has made a significant
