

its extreme complexity, he believed that any new treatment, such as Dr. Bancroft's, must take into account the necessity for more accurate knowledge concerning the chemistry of the opium alkaloids; more reliable information as to their effect on the human body and the exact nature of addiction; together with a satisfactory evaluation of the many psychobiological factors involving addiction about which we have little accurate, concrete knowledge.

"So far as we know there is no treatment for drug addiction from the standpoint of a specific cure that will miraculously operate to rid the drug addicts of their addiction," Dr. Treadway said. "Any treatment advocated for this particular purpose must be scrutinized with care and conclusions about it drawn only after months of experience with a very large group of patients."

HUMANS 75,000 YEARS AGO DESCRIBED BY PRE-HISTORIAN

PROFESSOR GEORGE G. MACCUDY, Director of the American School of Prehistoric Research, Yale University, writes that the records bearing on the physical characters of Neanderthal man are still relatively rare. But in the past few years they have become much more complete than are those of the pre-Neanderthal period, when such beings as Eoanthropus, Pithecanthropus, Sinanthropus and Homo Heidelbergensis existed.

Neanderthal man lived in the third inter-glacial and the early part of the fourth glacial epoch. In his physical make-up he retained many primitive characters, due to his branching from the main human stem as early as the Pliocene epoch. His lowly estate physically is even reflected in his kit of tools. Although a hunter, he never got so far as to represent by means of carvings, engravings or drawings in color the animals he hunted. This step was taken by his successor, the so-called race of Cro-Magnon.

The cable received from Theodore D. McCown, field director of the Joint Expedition of the American School of Prehistoric Research and the British School of Archeology at Jerusalem, said: "Three adult Mousterians surely Neanderthal, heavy brow ridges, taurodont dentition." This is said to be the greatest discovery of Neanderthal remains ever found. They are at a moderate estimate at least 75,000 years old.

The present is the fourth season of joint expeditions by the British and American Schools near the foot of Mount Carmel, during which time scores of thousands of artifacts, dating from the Mousterian and subsequent epochs, have been unearthed.

ITEMS

CANCER, it is claimed, can be detected by a serum reaction discovered by Dr. H. J. Fuchs, of Berlin. The reaction is based on the fact that fibrin from the blood of a person without cancer is broken down or digested by the serum of the blood of a person with cancer, with the production of some non-protein, nitrogenous substances which can be detected by suitable chemical means. The method, as it was described by Dr. Fuchs, required special apparatus and some special training for the observer, which tend to prevent its general use.

Professor M. von Falkenhausen, of the University of Breslau, Germany, now reports a simplification of the method that may make it possible for other observers to test its validity. He has introduced into the reaction a colorimetric procedure which he states makes the method more exact and at the same time much simpler to carry out. He reports a series of eighty cases in which the reaction was used and in which there was not a single failure in the diagnosis.

THE light from a distant nebula, such as one in the constellation of Ursa Major, reaches the earth at the ordinary speed of about 186,000 miles a second, even though the nebula is apparently moving from the earth at a velocity of 11,500 kilometers per second. This fact was discovered last year by Dr. Gustaf Strömberg, of the Mount Wilson Observatory. It has been confirmed by independent work of Dr. George Van Biesbroeck, at the Yerkes Observatory, of the University of Chicago. Both Dr. Strömberg and Dr. Van Biesbroeck have found that the aberration with the rapidly receding nebula is just the same as for nearer stars, even ones that are approaching us.

A POSSIBLE reconciliation between the at present discrepant results of "ether drift" experiments has been presented to the American Physical Society by Dr. N. Galli-Shohat, of Bryn Mawr College. This famous experiment, known as the Michelson-Morley experiment for the men who first performed it, failed to show any positive evidence of the existence of an ether, and set a train of scientific investigations in motion that eventually led to Einstein's relativity theory. Later, Professor Dayton C. Miller, of the Case School of Applied Science, repeated the experiment, and reported positive results. Dr. Galli-Shohat claims to reconcile the disagreement by taking into account, not the earth's motion about the sun, but the motion of the whole solar system through space.

DR. W. J. HUMPHREYS, of the U. S. Weather Bureau, told the American Meteorological Society, meeting in Washington, that the melting of the great ice caps of the earth would raise the ocean level about 150 feet. Explorations of the past year, which determined by sonic sounding the average thickness of the great Greenland ice sheet to be about one mile, make possible a fairly accurate estimate of the height the oceans will rise. Dr. Humphreys said that there must be 4,000,000 cubic miles of ice on Greenland, the Antarctic continent and Iceland, which may be expected eventually to melt.

THE germs of typhus fever and of spotted fever are very much alike, but differ in the important respect of growing in different parts of the cells they invade, Dr. Henry Piskerton and Dr. G. M. Hass, of Boston, reported to the American Association of Pathologists and Bacteriologists. The spotted fever germs grow and multiply massively in the nucleus of the cells, but infect the surrounding part of the cell only sparsely, they found from studying how the germs grow on animal tissues. Typhus fever germs, on the other hand, do not invade the nuclei of cells, but grow on the cytoplasm.

References For The Historian Of Science Introduction

In today's digital age, the availability of References For The Historian Of Science books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of References For The Historian Of Science books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of References For The Historian Of Science books and manuals for download is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing References For The Historian Of Science versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, References For The Historian Of Science books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing References For The Historian Of Science books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for References For The Historian Of Science books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural

artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, References For The Historian Of Science books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of References For The Historian Of Science books and manuals for download and embark on your journey of knowledge?

FAQs About References For The Historian Of Science Books

1. Where can I buy References For The Historian Of Science books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a References For The Historian Of Science book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
4. How do I take care of References For The Historian Of Science books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.

5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to track books read, ratings, and other details.
7. What are References For The Historian Of Science audiobooks, and where can I find them? Audiobooks: Audio recordings of books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer a wide selection of audiobooks.
8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores. Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media or recommend them to friends.
9. Are there book clubs or reading communities I can join? Local Clubs: Check for local book clubs in libraries or community centers. Online Communities: Platforms like Goodreads have virtual book clubs and discussion groups.
10. Can I read References For The Historian Of Science books for free? Public Domain Books: Many classic books are available for free as they're in the public domain. Free E-books: Some websites offer free e-books legally, like Project Gutenberg or Open Library.
