Doctor Franklin's Medicine Stanley Finger, 2012-12-21 Selected by Choice magazine as an Outstanding Academic Title Among his many accomplishments Benjamin Franklin was instrumental in founding the first major civilian hospital and medical school

and in the American colonies He studied the efficacy of smallpox inoculation and investigated the causes of the common cold His inventions including bifocal lenses and a long arm that extended the user's reach made life easier for the aged and afflicted In *Doctor Franklin's Medicine* Stanley Finger uncovers the instrumental role that this scientist inventor publisher and statesman played in the development of the healing arts enhancing preventive and bedside medicine hospital care and even personal hygiene in ways that changed the face of medical care in both America and Europe As Finger shows Franklin approached medicine in the spirit of the Enlightenment and with the mindset of an experimental natural philosopher seeking cures for diseases and methods of alleviating symptoms of illnesses He was one of the first people to try to use electrical shocks to help treat paralytic strokes and hysteria and even suggested applying shocks to the head to treat depressive disorders He also strove to topple one of the greatest fads in eighteenth century medicine mesmerism *Doctor Franklin's Medicine* looks at these and the many other contributions that Franklin made to the progress of medical knowledge including a look at how Franklin approached his own chronic illnesses of painful gout and a large bladder stone Written in accessible prose and filled with new information on the breadth of Franklin's interests and activities *Doctor Franklin's Medicine* reveals the impressive medical legacy of this Founding Father

The Shocking History of Electric Fishes Stanley Finger, Marco Piccolino, 2011-09-08 This beautifully illustrated and scholarly book examines the importance of electric fishes in science and medicine and how three species in particular shaped neurophysiology Anchored in the philosophy and science of past epochs it is the story of one of Nature's greatest puzzles Over a long and tortuous path it focuses on how some numbing fishes helped to make physiology modern

Brush with Death Christian Warren, 2000 Winner of the Arthur Viseltair Award for Outstanding Book in the History of Public Health from the American Public Health Association Selected by Choice Magazine as an Outstanding Academic Title During the twentieth century lead poisoning killed thousands of workers and children in the United States Thousands who survived lead poisoning were left physically crippled or were robbed of mental faculties and years of life In *Brush with Death* social historian Christian Warren offers the first comprehensive history of lead poisoning in the United States Focusing on lead paint and leaded gasoline Warren distinguishes three primary modes of exposure occupational pediatric and environmental This threefold perspective permits a nuanced exploration of the regulatory mechanisms medical technologies and epidemiological tools that arose in response to lead poisoning Today many children undergo aggressive deleading treatments when their blood lead levels are well below the average blood lead levels found in urban children in the 1950s Warren links the repeated redefinition of lead poisoning to changing attitudes toward health safety and risk The same changes that transformed the social construction of lead poisoning also transformed medicine and health care giving rise to modern environmentalism and fundamentally altered jurisprudence

Toxic Truth Lydia Denworth, 2018-07-19 They didn't start out as environmental warriors Clair Patterson was a geochemist focused on determining the age of the Earth Herbert Needleman was a pediatrician treating inner city children But in the chemistry lab

and the hospital ward they met a common enemy lead It was literally everywhere in gasoline and paint of course but also in water pipes and food cans toothpaste tubes and toys ceramics and cosmetics jewelry and batteries Though few people worried about it at the time lead was also toxic In Toxic Truth journalist Lydia Denworth tells the little known stories of these two men who were among the first to question the wisdom of filling the world with such a harmful metal Denworth follows them from the ice and snow of Antarctica to the schoolyards of Philadelphia and Boston as they uncovered the enormity of the problem and demonstrated the irreparable harm lead was doing to children In heated conferences and courtrooms the halls of Congress and at the Environmental Protection Agency the scientist and doctor were forced to defend their careers and reputations in the face of incredible industry opposition It took courage passion and determination to prevail against entrenched corporate interests and politicized government bureaucracies But Patterson Needleman and their allies did finally get the lead out since it was removed from gasoline paint and food cans in the 1970s the level of lead in Americans bodies has dropped 90 percent Their success offers a lesson in the dangers of putting economic priorities over public health and a reminder of the way science and individuals can change the world The fundamental questions raised by this battle what constitutes disease how to measure scientific independence and how to quantify acceptable risk echo in every environmental issue of today from the plastic used to make water bottles to greenhouse gas emissions And the most basic question how much do we need to know about what we put in our environment is perhaps more relevant today than it has ever been

Environmental Engineering Science William W. Nazaroff, Lisa Alvarez-Cohen, 2000-11-20 This text provides a thorough and balanced introduction to water quality engineering air quality engineering and hazardous waste management The text develops the scientific principles needed to understand environmental engineering and then brings those principles to life through application to the real world solutions of environmental problems Suitable for a junior senior level course in environmental engineering but is also appropriate for graduate students who lack a solid background in environmental engineering

Lost Legion Rediscovered Donald O'Reilly, 2014-07-19 In AD383 according to Bishop Eucherius of Lyon flooding caused part of the bank of the River Rhone to collapse revealing a mass grave of thousands of bodies Eucherius identified these as a legion recruited for the Roman army from the Christians of the Theban district in Egypt whom he claimed had been massacred nearly a century previously near the modern village of St Maurice en Valais in southwestern Switzerland for refusing to obey orders they considered immoral This incident asserted by Eucherius as matter of fact is unrecorded elsewhere Even the existence of this Theban legion is unclear
