perspectives of high culture pop subverts notions of authenticity and inauthenticity original and copy aura and commodity medium and message Gayraud demonstrates that far from being the artless and trivial mass produced pabulum denigrated by Adorno pop is a rich self reflexive artform that recognises its own contradictions incorporates its own productive negativity and often flourishes by thinking against itself Dialectic of Pop sings the praises of pop as a constitutively impure form resulting from the encounter between industrial production and the human predilection for song and diagnoses the prospects for twenty first century pop as it continues to adapt to ever changing technological mediations

**The Cooking of History** Stephan Palmié, 2013-06-14 Over a lifetime of studying Cuban Santería and other religions related to Orisha worship a practice also found among the Yoruba in West Africa Stephan Palmié has grown progressively uneasy with the assumptions inherent in the very term Afro-Cuban religion In *The Cooking of History* he provides a comprehensive analysis of these assumptions in the process offering an incisive critique both of the anthropology of religion and of scholarship on the cultural history of the Afro-Atlantic World Understood largely through its rituals and ceremonies Santería and related religions have been a challenge for anthropologists to link to a hypothetical African past But Palmié argues precisely by relying on the notion of an aboriginal African past and by claiming to authenticate these religions via their findings anthropologists some of whom have converted to these religions have exerted considerable influence upon contemporary practices Critiquing widespread and damaging simplifications that posit religious practices as stable and self-contained Palmié calls for a drastic new approach that properly situates cultural origins within the complex social environments and scholarly fields in which they are investigated

Love joins musical analysis historical research and cultural theory to trace parallel shifts in these industries over eight decades In addition to scholarly and industry resources she draws on first-hand accounts pop culture magazines trade press journals and other archival materials Pepsi's longevity as an influential American brand its legendary commercials and its pioneering relentless pursuit of alliances with American musical stars makes the brand a particularly instructive point of focus Several of the company's most famous ad campaigns are prime examples of the practice of redaction whereby marketers select censor and restructure musical texts to fit commercial contexts in ways that revise their aesthetic meanings and serve corporate aims Ultimately Love demonstrates how Pepsi's marketing has

historically appropriated and altered images of pop icons and the meanings of hit songs and how these commercials shaped relationships between the American music business the advertising industry and corporate brands Soda Goes Pop is a rich resource for scholars and students of American studies popular culture advertising broadcast media and musicology It is also an accessible and informative book for the general reader as Love s musical and theoretical analyses are clearly presented for non specialist audiences and readers with varying degrees of musical knowledge      **Underground Petersburg**
