Gamble, 2005 Marketing Revolution is based on the experience of IBM and its leading business partners particularly software suppliers and marketing communications suppliers in transforming themselves and their clients marketing The writers consultants academics and practitioners have drawn on recent research by IBM and analysts how is the marketing function managed in companies all over the world and how can it be improved The book shows senior marketing managers those who advise them and those who study advanced marketing how marketing can be greatly improved by taking a radical rather than an incremental approach to planning and implementing marketing Marketing Transformation MT is the process by which companies completely re architect re engineer or even entirely rebuild their marketing capability structure processes systems partnerships etc to create radically increased business value whether through efficiency same results at much lower cost

effectiveness much better results at same cost acceleration doing things faster quality doing things in a more complete integrated fashion or some combination of all of these

The Market Revolution and its Limits Alan Shipman, 2002-01-22 The Market Revolution and its limits summarises why many economists believe that markets are best It explores how even market failures can be given market solutions and asks why market ideas seem to have taken such a firm hold Non polemical in its approach this book provides a comprehensive appraisal of the market and its alternatives backed up with empirical international illustrations Shipman concludes that the revolution lies in redefining the market process rather than the market outcome
