Large-scale Silviculture Experiments of Western Oregon and Washington Nathan Jeremy Poage,2007 We review 12 large scale silviculture experiments LSSEs in western Washington and Oregon with which the Pacific Northwest Research Station of the USDA Forest Service is substantially involved We compiled and arrayed information about the LSSEs as a series of matrices in a relational database which is included on the compact disc published with this report and available online at <http://www.fs.fed.us/pnw/research/lsse> The LSSEs are both spatially and temporally large scale with experimental treatment units between 5 and 100 acres and proposed study durations of 20 to 200 years A defining characteristic of the LSSEs is that a broad range of response variables are measured to characterize the response of forest ecosystems to experimental treatments We discuss the general value and limitations of the LSSEs and highlight some possible roles that can be played by the LSSEs in addressing management issues emerging at the beginning of the 21st century
