Administrative Reform Gerald E. Caiden,2017-07-05 What is administrative reform How is it differentiated from other kinds of social reform Who are administrative reformers and how do they approach their task And who benefits and who suffers from it Does a theory of administrative reform exist A survey of published research on administrative reform reveals that satisfactory answers to these questions are handicapped by methodological and theoretical shortcomings There are no common definitions no agreement over content no selected boundaries no clear links with the wide phenomenon of social reform no firm hypothesis tested by empirical findings and no continuous dialogue between practitioners and theorists This book is the first comprehensive and systematic treatment of the subject for professionals and students in the fields of public and private administration It carefully examines the diverse interdisciplinary literature on the subject and identifies and develops the most promising approaches towards a unified theory Caiden shows how the study of administrative reform can contribute substantially to the development of administrative theory and constructs a working definition of the phenomenon of administrative reform distinguishing it from social change and from administrative change The practical use of this definition is tested by the analysis of various case histories of administrative cultures of different periods in history from which a common cycle of reform processes is discerned The author follows with a detailed examination of the processes themselves The book concludes with a discussion of the obstacles to reform and a review of the author s findings and conclusions

that if we are to think differently about management we must first rewrite management history National Defense Resources Conference Industrial College of the Armed Forces (U.S.),1969 National Security Seminar: Outlines and Reading Lists Joint Chiefs of Staff, *Ford Distinguished Lectures* ,1964 *Managerialism for Economic Development* P. Prasad,A.R. Negandhi,2012-12-06 That a developing economy needs management even more than resources is now becoming abundantly clear to all students of growth There was perhaps a facile assumption in the earlier years that the rate of growth in a developing country depended in almost direct proportion to two factors the resources available within the country the land water minerals savings and other relevant inputs and the initial importation of aid from without in terms of capital and skills not available within but the factor of good management was somehow ignored as also the attitudes of the people and their leadership to growth These two factors are now coming into their own as being crucial to development and there is a new appreciation of the need for a good supply of well trained managers and providing them with an environment that is permissive and encouraging These essays are a timely analysis of this new felt need and a valuable source of new leads and hypotheses for they examine the multi facets of the problem of India s growth but with keeping the professional manager squarely in the middle of the study And after all it is he upon whom the major responsibility for develop ment and growth will depend given the chance The contributors to this symposium are seven young Indians all management educators of distinction at universities in the United States and one hopes that they will themselves pick up some of the leads and pursue them P L Rebirth of M. P. Follett's Dynamic Management Thought Izumi Mitsui,2025-08-15 The purpose of this book is to reevaluate the dynamic management thought of M P Follett 1868 1933 and recreate it for the construction of a new society after the COVID 19 era Here the focus is especially on the main concept of her dynamic social process concept interweaving and showing its current applicability It should also be noted that the time Follett created this concept was when the 1918 pandemic Spanish flu struck Boston Based on her academic background in political science philosophy history psychology and related disciplines Follett had many years of practical experience as a social worker in Boston and advocated a social view based on the dynamic interaction of individuals It included rebuilding social relations social development as a continuous process and creating a community experience through the interweaving of individual experiences One of the important issues that COVID 19 poses is the breaking and restructuring of human relations in communities and societies The author believes that such an issue could be easily resolved by information and communications technology ICT networks While it is a powerful tool we are now aware that it also has the effect of isolating individuals and inciting conflicts The author applies Follett s ideas to approach such problems In this book her perspectives on the interweaving process of experience and its position are emphasized as important concepts for creating new communities for the post COVID 19 era Expressed symbolically they correspond to interweaving experiences in the internet society **Strategic Management in the Innovation Economy** Thomas H.
