Scott, 1986 **Journal of Management Information Systems**, 1995 *MIS Cases* M. Lisa Miller, 2005. Appropriate for any course introducing management information systems from a business perspective. This casebook will serve as an ideal complement to most MIS/CIS textbooks. Designed to demonstrate how software can support managerial decision making activities, this casebook features 24 cases more than another casebook currently on the market covering a wide range of functional areas throughout the business including finance accounting HR production and information systems. The cases are spread across three difficulty levels: basic, intermediate, and advanced. They present common managerial issues and problems and encourage students to actually use their models to make decisions for the cases' characters. They require students to apply spreadsheet database Web page development and/or presentation graphics software often in an integrated manner. Many of the cases require students to prepare both written and oral presentations on their solutions. Among the topics covered in *MIS Cases*: Decision Making with Application Software, Second Edition, forecasting, inventory decisions, what-if analyses, pricing strategies, billing decisions, and much more. **The Management of Information Systems** Gary W. Dickson, James C. Wetherbe, 1985 *Management Information Systems* James A. O'Brien, 2004 **Viewpoint-based Flexible Information System Architectures** Dmitri Valeri Panfilenko, 2021-06-07. Information system architecture (ISA) specification as a part of software engineering field has been an information systems research topic since the 60s of the 20th century. There have been manifold specification methodologies over the recent decades developed newly or adapted in order to target the domains of software modelling, legacy systems, steel production and automotive safety. Still, there exist

considerable issues constituting the need for a flexible ISA development e.g. incomplete methodology for requirements in model driven architectures lacking qualitative methods for thorough definition and usage of viewpoints. Currently existing methods for information system architecture specification usually devise the target architectures either addressing only a part of software life cycles or neglecting less structured information. The method for flexible information system architectures FISA specification uses the viewpoint concept for mediating the domain expert and technical system levels. The FISA method defines construction and application reference models based on the ANSI IEEE Standard 1471-2000 viewpoints with model transformations based on OMG Standard Model Driven Architecture MDA and four different approaches for ISA specification thus providing for flexibility both in construction and refactoring procedures. The development of FISA method has been based on a thorough analysis of the ISA specification method field and constructs a comprehensive procedure and reference engineering models for flexible ISA specification. The genericity of the conceived construction and application procedure models of FISA allows for its usage not only in research but also in industry settings as presented on illustrative scenarios in steel manufacturing and automotive safety.

Business Voyages Richard John Stapleton, 2010-05-06. *Business Voyages* is not a business fairy tale. Much of it really happened. Don't read this book if you are looking for simple answers and magic formulas. Although the book includes some concepts and techniques anyone should know about people and business it does not promise success. *Business Voyages* is problem oriented presenting some of the problems encountered by the author and others on their business voyages while explaining tools and processes anyone can use for analyzing and dealing with inevitable problems that will be encountered in any business world. *Business Voyages* is also opportunity oriented showing the reader how one might embark on a business venture at the right time and place and enjoy the winnings of a successful voyage.

ICT Management in Non-Profit Organizations Ariza-Montes, José Antonio, 2014-04-30. The instability of today's economic climate calls for non-profit organizations to approach social problems in new and interesting ways and Information and Communication Technologies may serve as an answer to this call. *ICT Management in Non-Profit Organizations* aims to explore the effective and comprehensive deployment of appropriate ICT strategies within the nonprofit sector. This innovative reference work will discuss how ICT enables the non-profit sector to achieve organizational efficiency, effectiveness and ultimately self-sufficiency and will provide elected and appointed policymakers, managers and planners in governments, public agencies and nonprofit organizations with a comprehensive strategy for creating an ICT management agenda in the non-profit sector.
