Huber, 1980 Includes index **Managerial Decision Making** Jeffrey Yi-Lin Forrest, Jeananne Nicholls, Kurt Schimmel, Sifeng Liu, 2019-10-01 This book develops a general theory of managerial decision making on the basis of a few elementary postulates. It employs logic as the method of reasoning systems science in general and the systemic YoYo Model in particular as the intuitive playground. By doing so, the authors take individually background based guesswork out of processes of decision making. All established conclusions are expected to be generally employable in real life applications. At the same time, the book is user friendly to a wide range of audience, coincides with people's intuition and provides applicable results and insights for practical purposes. *The Application of Fuzzy Logic for Managerial Decision Making Processes* Andreas Meier, Edy Portmann, Kilian Stoffel, Luis Terán, 2017-03-30 This book addresses the latest research and applications of fuzzy management methods for business decisions. It showcases a broad set of applications and discusses topics such as measures for the quality of analytics outcomes in big data environments, how fuzzy management methods support the inclusion of human thinking and human behavior in decision making processes, how to generate better results with fuzzy management methods in cases of imprecise information, new personalization concepts enabled by fuzzy logic for the offering of customized products and services especially in the electronic market, and lastly the application of fuzzy analysis for executives using natural rather than computer language.
