Step by step techniques for modeling the portrait in clay firing methods and mold making **Ancient Greek Portrait Sculpture** Sheila Dillon, 2006-04-24 This book offers a new approach to the history of Greek portraiture by focusing on portraits without names. Comprehensively illustrated, it brings together a wide range of evidence that has never before been studied as a group. Sheila Dillon considers the few original bronze and marble portrait statues preserved from the Classical and Hellenistic periods together with the large number of Greek portraits known only through Roman copies. In focusing on a series of images that have previously been ignored, Dillon investigates the range of strategies and modes utilized in these portraits to construct their subject's identity. Her methods undermine two basic tenets of Greek portraiture: first, that it was only in the late Hellenistic period under Roman influence that Greek portraits exhibited a wide range of styles including descriptive realism; and second, that in most cases one can easily tell a subject's public role, that is, whether he is a philosopher or an orator, from the visual traits used in this portrait. The sculptures studied here instead show that the proliferation of portrait styles takes place much earlier in the late Classical period and that the identity encoded in these portraits is much more complex and layered than has previously been realized. Despite the fact that these portraits lack the one feature most prized by scholars of ancient portraiture—a name—they are evidence of utmost importance for the history of Greek portraiture.

Native American and First Nation Figures in Sculpture Fred F. Poyner IV, 2025-04-10 The art of public structure is nearly as old as society itself, and its figurative representations and gaps represent deep wells of insight into culture. This book examines sculptors both old and new and how the work of each one has presented Native Americans and First Nations peoples as figurative subjects found throughout the public sculpture of North America over the past 200 years. Offering thorough examination of artworks by 50 different sculptors throughout the United States and Canada, this book profiles how artists have incorporated either traditional native styles and techniques or European artistic styles and training to create these figurative subjects in wood, stone, marble, bronze, and other materials, to what degree or not they utilized indigenous models or figures, photographs of individuals or other primary sources to create their sculptures, how each sculpture relates to its landscape and display location, and how each sculptor's own life relates to the works they have created for public viewing. Both historical statuary and public sculpture that has distinctive artistic representation or styles are examined. Also included are oral history interviews, photographs, and first-hand accounts to help better understand all of these artworks. Each of the sculptors profiled here reflects a mixture of gender, ethnicity, and nationality in their identity and backgrounds as diverse and varied a group as the subjects of their public sculpture.

Bernini and the Birth of Baroque Portrait Sculpture Andrea Bacchi,Catherine Hess,Jennifer Montagu,2008-01-01

Gian Lorenzo Bernini was the greatest sculptor of the Baroque period and yet surprisingly there has never before been a major exhibition of his sculpture in North America. Bernini and the Birth of Baroque Portrait Sculpture showcases portrait sculptures from all phases of the artist's long career from the very early Antonio Coppola of 1612 to Clement X of about 1676, one of his last completed works. Bernini's portrait busts were masterpieces of technical virtuosity at the same time they revealed a new interest in psychological depth. Bernini's ability to capture the essential character of his subjects was unmatched and had a profound influence on other leading sculptors of his day such as Alessandro Algardi, Giuliano Finelli, and Francesco Mochi. Bernini and the Birth of Baroque Portrait Sculpture is a groundbreaking study that features drawings and paintings by Bernini and his contemporaries. Together they demonstrate not only the range, skill, and acuity of these masters of Baroque portraiture but also the interrelationship of the arts in seventeenth-century Rome.

The Encyclopedia Americana Frederick Converse Beach, 1904 *The Americana* Frederick Converse Beach, George Edwin Rines, 1912 *The Americana*, 1908 *Iconic Investigations* Lars Elleström, Olga Fischer, Christina Ljungberg, 2013. The contributions to *Iconic Investigations* deal with linguistic or literary aspects of language. While some studies analyze the cognitive structures of language, others pay close attention to the sounds of spoken language and the visual characteristics of written language. In addition, this volume also contains studies of media types such as music and visual images that are integrated into the overall project to deepen the understanding of iconicity, the creation of meaning by way of similarity relations. Iconicity is a fundamental but relatively unexplored part of signification in language and other media types. During the last decades, the study of iconicity has emerged as a vital research area with far-reaching interdisciplinary scope, and the volume should be of interest for students and researchers interested in scholarly fields such as semiotics, cognitive linguistics, conceptual metaphor studies, poetry, intermediality, and multimodality.

Library of Congress Subject Headings Library of Congress. Cataloging Policy and Support Office, 2009 *Library of Congress Subject Headings* Library of Congress, 2007 *Bernini* Claude Douglas Dickerson (III), Gian Lorenzo Bernini, Anthony Sigel, Ian Wardropper, 2012. The brilliantly expressive clay models created by Gian Lorenzo Bernini, 1598–1680, as sketches for his works in marble offer extraordinary insights into his creative imagination. Although long admired, the terracotta models have never been the subject of such detailed examination. This publication presents a wealth of new discoveries, including evidence of the artist's fingerprints imprinted on the clay, resolving lingering issues of attribution while giving readers a vivid sense of how the artist and his assistants fulfilled a steady stream of monumental commissions. Essays describe Bernini's education as a modeler, his approach to preparatory drawings, his use of assistants, and the response to his models by 17th-century collectors. Extensive research by conservators and art historians explores the different types of models created in Bernini's workshop. Richly illustrated, *Bernini* transforms our understanding of the sculptor and his distinctive and fascinating working methods. Publisher's website.
