Governance for a Sustainable Future Yukio Adachi, Makoto Usami, 2023-09-23 Although the expression responsibility to future generations is firmly established in public and political vocabulary its operational meaning and practice are inadequately understood and yet to be systematically evaluated Moreover the term has not been successfully translated into viable ethical and theoretical concepts that can guide public policies and actions How can the modes of governance and established policy priorities become compatible with the well being of future generations The primary objective of this book is to identify the conditions of and obstacles to governance for a sustainable future or future regarding governance Governance concerns steering a society over extended periods of time not responding to particular policy issues The ideas and strategies proposed by contributors in this book to establish future regarding governance are based on the theoretical and empirical analyses of the major long term problems facing advanced democracies in general and Japan in particular Japan is an interesting case indeed Relatively poor climate policy rapidly decreasing birth rate aging population extensive public debt prolonged economic recession healthcare and pension systems that urgently require redesigning hollowing out of industries and subsequent loss of jobs deteriorating infrastructures increasing nuclear waste and intensifying social polarization have caused a decline in people's trust in the government and democratic processes Currently Japanese citizens are widely circulating their doubts about the social system's sustainability This book comprises two parts In Part I authors from various disciplinary backgrounds examine the idea of governance for a sustainable future from theoretical perspectives This part discusses issues associated with future regarding governance that are wicked in nature such as the philosophical ethical foundation on which to base the idea of governance for a sustainable future major impediments to the development of future regarding governance and the modes of thinking and action required by leaders and citizens to realize such governance Chapters in Part II largely focus on the state of long term governance in Japan This part uses empirical and in depth analyses with cross sectoral and cross national policy perspectives to identify the state of

future regarding governance in various policy fields and major sectors or organizations mainly in Japan while also examining strategies and measures to improve their performance From this perspective Western democracies and weak democratic regimes elsewhere will be provided with valuable lessons to avoid fatal policy mistakes thereby improving future oriented governance worldwide By combining theoretical discussions on far reaching issues and empirical analyses of Japanese cases the book will shed a new light on governance for a sustainable future

,1918 *Proceedings of the 2nd International Conference on Changing of Business Law (ICOCLB 2024)* Edy Lisdiyono,Ade Saptomo,Faisal Santiago,I Nyoman Budiarta,Ahmad Sudiro,Zaenal Arifin Hoesein,Laksanto Laksanto,Wasis Susetio,Zulfikar Judge,2025-02-08 This is an open access book Currently the influence of shifts and changes in the legal system due to global political social and economic dynamics demands significant changes to harmonize and adapt the various realities of human relations which are currently dominated by various activities in cyberspace Law is the most important and strategic instrument in organizing the space for social interaction and changes in other social institutions and institutions in the current era Therefore it is not only about 3 legal instruments such as norms legal institutions and their enforcement but the

most important thing is legal education which will build not only legal instruments and systems but also awareness of a new legal culture. Thus structuring legal education and its educational ecosystem which is connected to other aspects such as economics, social, cultural, religious, political, and so on is a necessity that continues to be developed. Law is also the glue and device of a world that is all connected and cross border connected to the digital world as well as an interconnected global society making an agreement on a common global goal help individuals, institutions, and governments throughout the world to agree on the direction of development focusing on things that are truly beneficial for the future, directing all parties to focus on the same thing, mobilizing all resources, and making it easier to organize and implement so that all parties can move together towards the achievements they hope for. By having a common goal, every policy and development step taken by every national leader will always be tested by the public. This means that a common goal provides a common opportunity for all elements of society to control the entire development process in order to remain faithful to the path towards mutual achievement, encouraging mobilization of all networks of expertise, knowledge, and practices to overcome various difficulties faced in implementing sustainable development and mobilize all stakeholder networks. This multi stakeholder process is critical to addressing complex challenges in sustainable development and the fight against poverty, hunger, and disease. In line with the global agenda called Sustainable Goals Development, especially point 4 of SGD's goals which sets the goal of providing quality education, this is also included in the world of legal education. The SDGs goals above are interconnected and influence each other. To achieve the SDGs goals, collaboration and cooperation are needed. These SDGs are a global commitment to achieve better sustainable development. Every country, including Indonesia, has a responsibility to achieve the SDGs goals. By paying attention to sustainability aspects in every decision and action, we can build a better and more sustainable future for future generations. Thus, there is a need for strategic partnerships, especially at the national and regional levels, which will harmonize various curricula and learning methods, especially in the field of law, in order to achieve a parameter of success in the development of national and regional law, which is one of the elements of the resilience of a country or region. This is considered necessary and strategic, considering that currently the dynamics of the region are being influenced by global turmoil in various fields, as well as the ongoing struggle for hegemony among world geopolitical and geoeconomic forces in the new world balance order. Therefore, this international seminar and call for papers is an opportunity for participants to find out about harmonization and strategic cooperation in legal education, especially in the era of disruption, economic, and digital, and to know its relevance for development at the ASEAN level.
