Modern Britain Architecture:

The Politics of Architecture Anthony Jackson, 1970-12-15 The history of British architecture since 1930 has been one of frequently heated controversy between the old idiom and the new and between various social and technological viewpoints The battle is by no means over indeed it is spreading to wider issues and outside what was previously a largely professional sphere A book like this one which spells out the issues and describes how they arose is therefore of interest not only to architects and students of architecture but to the growing general public concerned about the man made environment Professor Jackson looks at the buildings of the period as the products of peculiar sets of circumstances as works of art and in terms of what their designers were trying to achieve And since there is much worth studying in the critical zone that separates architectural claims and hopes from social and aesthetic reality this book offers both essential background material and a fascinating narrative that will in itself be a subject of controversy

Designing Modern Britain Cheryl Buckley, 2007-10-01 British culture is marked by indelible icons red double decker buses large oak wardrobes and the compact sleekness of the Mini But British industrial and product design have long lived in the shadows of architecture and fashion Cheryl Buckley here delves into the history of British design culture and in doing so uniquely tracks the evolution of the British national identity Designing Modern Britain demonstrates how interior design ceramics textiles and furniture craft of the twentieth century contain numerous hallmark examples of British design The book explores topics connected to the British design aesthetic including the spread of international modernism the eco conscious designs of the 1980s and 1990s and the influence of celebrity product designers and their labels Buckley also investigates popular nostalgia in recent times considering how museum and gallery exhibitions have been instrumental in reimagining Britain's past and how the heritage industry has fueled a growing trend among designers of employing images of British culture in their work A thoughtful look at the aesthetic heritage of a nation that has left its footprint around the globe Designing Modern Britain will be a valuable text for students and professionals in design

A Short History of British Architecture Simon Jenkins, 2024-11-07 Provocative elegant intriguing Jenkins is a bold imaginative writer brilliant at challenging old assumptions and encouraging you to look at British architecture in a new light Rory Stewart The story of Britain is revealed through its buildings and yet the language of architecture is a mystery to all but a few In this enlightening history spanning castles and cathedrals to factories and railway stations Jenkins translates the hidden narratives infused in the facades we walk past every day Britain's history has been formed by its politics religion and society and these influences can be seen in the architectural styles that have shaped its landscape From pre Roman and the Middle Ages to the Renaissance and the

Industrial Revolution Classical and Gothic styles surged and retreated from favour only to then be challenged by a new player Modernism a style that reflected the stunning technological advances of the second half of the twentieth century In this narrative history Simon Jenkins the bestselling champion of our national heritage introduces us to the singular eccentric and sometimes rather ordinary characters who shaped Britain Jenkins teaches readers to see the world anew demystifying the elitist language of architecture so that we can all appreciate the buildings around us **Modern Buildings in Britain**

Owen Hatherley,2022-04-07 The definitive illustrated guide to modern British architecture from one of the most acclaimed critics at work today Modernism is now a century old and its consequences are all around us built into our everyday lived environments Its place in Britain s history is fiercely contested and its role in our future is the subject of ongoing controversy but modernist buildings have undoubtedly changed our cities politics and identity forever In Modern Buildings in Britain Owen Hatherley applauds the ambition and explores the significance of this most divisive of architectures travelling from Aberystwyth to Aberdeen from St Ives to Shetland in search of our most important and distinctive modern buildings Drawing on hundreds of examples we learn how the concrete of Brutalism embodies post war civic principles how corporate values were expressed in the glass fa ades of the International Style and why Ecomodernist experimentation is often consigned to the geographic fringes As Hatherley considers the social political and cultural value of these structures a number of which are threatened by demolition two linked questions emerge what happens to a building after it has been lived in and what becomes of an idea when its time has passed With more than six hundred pages of trenchantly opinionated often witty analysis and with three hundred photographs in duotone and colour Modern Buildings in Britain is a landmark contribution to the history of British architecture **Britain** Alan Powers,2007 Thoroughly illustrated with images of the buildings under discussion advertisements and other historical photographs Britain is an authoritative yet highly accessible account of twentieth century British architecture **A Bibliography of British History, 1914-1989** Keith Robbins,American

Cataloging Policy and Support Office,2007 **Library of Congress Subject Headings** Library of Congress,2003 **Art, Propaganda and Aerial Warfare in Britain during the Second World War** Rebecca Searle,2020-07-23 The War Artists Advisory Committee WAAC were responsible for the production of some of the most iconic images of the Second World War Despite its rich historical value this collection has been poorly utilised by historians and hasn t been subjected to the levels of analysis afforded to other forms of wartime culture This innovative study addresses this gap by bringing official war art into dialogue with the social economic and military histories of the Second World War Rebecca Searle explores the tensions between the documentarist and propagandistic roles of the

WAAC in their representation of aerial warfare in the battle for production the Battle of Britain the Blitz and the bombing of Germany Her analyses demonstrate that whilst there was a strong correlation between war art and propaganda the WAAC depicted many aspects of experience that were absent from wartime propaganda such as class divisions within the services gendered hierarchies within industries civilian death and the true nature of the bombing of Germany In addition she shows that propagandistic constructions were not entirely separate from lived experience but reflected experience and shaped the way that individuals made sense of the war Accessibly written highly illustrated and packed with valuable examples of the use of war art as historical source this book will enhance our understanding of the social and cultural history of Britain during the Second World War
