The Seventy's Course in Theology, Second Year B.H. Roberts, 2023-07-21 Reproduction of the original **The Modern Soldier Can Not be Made in a Day** Henry Breckinridge, 1914 **The Construction of Value Philosophy in Contemporary China** Deshun Li, 2025-03-11 This book approaches humanism in the new era in China by discussing the nature of value philosophy and by analyzing in depth the significance of value research for China's modernization and future development. The author expounds his own point of view on the value of human beings as the foundation of value philosophy and subsequently applies it to understanding conflicting values between China and the West, universal values, etc. In addition, he discusses the cultural value concept in China, e.g., the craze for traditional Chinese culture, value choices in socialism with Chinese characteristics, and Deng Xiaoping's great practice. Combining the fields of academic study, political affairs, cultural communication, and social life, the book offers a valuable resource for scholars, researchers, politicians, diplomats, university students, and those who want to study and understand value philosophy, Chinese value research, and Chinese culture. In addition, it seeks to realize the value of human beings in culture. Lastly, its discussions on the value concept can facilitate understanding and respect among people's all over the world. [The American Architect](#), 1919 **American Architect and the Architectural Review**, 1919 *Flying Machines: Construction and Operation* Thomas Herbert Russell, Octave Chanute, William J. Jackman, 2022-08-15 In *Flying Machines: Construction and Operation*, Thomas Herbert Russell, alongside Octave Chanute and William J. Jackman, offers a comprehensive treatise on early aviation technology, meticulously detailing the intricacies of airship design, construction, and piloting. With its precise illustrations, working plans, and accessible text, the book transcends mere technical manual to become a pivotal document of its era, capturing the zeitgeist of the turn of the century, innovation, and the human yearning for the skies. The literary style is expository and pedagogical, aiming to demystify aerial navigation for the enthusiast and professional alike and situated firmly within the literary context of practical guidebooks of industrial advancements during that period. Thomas Herbert Russell was an esteemed writer and editor with a keen interest in technological advancements. His collaboration with pioneering aeronautical engineers like Chanute and Jackman not only underpins the book's authoritative voice but also embodies the collaborative spirit essential for the era's rapid technological progress. The inspiration behind such a work likely stems from Russell's aspiration to document and disseminate groundbreaking engineering principles to a captivated public during a time when the potential of flight was beginning to be realized. Recommended for historians of technology, aeronautical enthusiasts, and anyone fascinated by the birth of flight, *Flying Machines: Construction and Operation* stands as a testament to human ingenuity and the spirit of exploration. The book invites readers on a journey back to a time when aviation stood on the cusp of revolution and provides a glimpse into the minds of those who laid the groundwork for the aerodynamic principles and innovations that are still relevant in aeronautical design today. This meticulous reproduction by DigiCat Publishing ensures that the legacy of Russell and his co-authors
