**Modern Perspectives in Adolescent Psychiatry** John G. Howells, 1971 The U S National Institutes of Health NIH presents the full text of a report entitled Workshop on the Medical Utility of Marijuana by the Ad Hoc Group of Experts at the institute The NIH held a two day scientific meeting on February 19 20 1997 to review the scientific data concerning the potential therapeutic uses for marijuana and the need for and feasibility of additional research The group recommends more research on the functional roles of cannabinoid receptors and that risks associated with marijuana should be considered

Howells, 1971 *The Mosaic of Contemporary Psychiatry in Perspective* Anthony Kales, Chester M. Pierce, Milton Greenblatt, 2012-12-06 Psychiatry has undergone a dynamic evolution in the last 40 years an evolution to which Dr Louis West made many contributions Psychiatry today and Dr West s career are intertwined in a mosaic of interaction It is therefore fitting that this compilation of essays in honor of Dr West is entitled The Mosaic of Contemporary Psychiatry Current Perspectives The papers collectively form a snapshot of the field of psychiatry today Each chapter offers a historical perspective of the topic discussed followed by a description of modern day issues and a look at the future of psychiatry This book will enhance the knowledge and technical skills of psychiatrists as well as other clinicians in the mental health care field **Catalog of the Research Library of the Reiss-Davis Child Study Center, Los Angeles, California: L-Z** Reiss-Davis Child Study Center. Research Library, 1978 **Modern Perspectives in International Child Psychiatry ;; Ed. by John G. Howells. Introd. by Leo Kanner** John G. Howells, 1969 **A Resident's Guide to Psychiatric Education** M. Thompson, 2012-12-06 This is the inaugural volume of the new series Critical Issues in Psychiatry An Educational Series for Residents and Clinicians It is an appropriate beginning for this book represents a milestone in the evolution of psychiatric education For the first time there will now be a single place where one can find a comprehensive collection of educational goals and objectives to define the broad spectrum of knowledge and skills essential for general and child psychiatry This collection does not represent the bias of a single educator or program Rather it consists of a consensually validated ranking of relative importance for each educational goal and objective as determined by a large and

international sampling of experienced psychiatric educators as well as an editorial board with some of the most distinguished names in psychiatric education. It is even possible to tell at a glance whether the ranked level of importance is the same or different within several national groups for example Canadians vs Americans. This book is intended for all students of psychiatry. It is particularly valuable to residents in training but equally so for experienced clinicians preparing for Board examination or simply attending to the process of continuing education and intellectual renewal. While it might well be used by an institution to delineate the dimensions of a training program in psychiatry, it is intended primarily for the self evaluation and self monitoring of one's growth as a psychiatrist. *Principles and Practice of Child Psychiatry* Stella

Chess, Mahin Hassibi, 2013-06-29 Stella Chess's many admirers throughout the world have long looked forward to the day when she would produce her own textbook of child psychiatry. They will not be disappointed in this thoughtful and perceptive account of the principles and practices of the subject written in collaboration with Dr Hassibi. It has all the hallmarks we have come to recognize as distinctive of the Chess approach to child psychiatry: gentle yet subtle and penetrating, always appreciative of the feelings and concerns of both the children and their parents, well informed and critically aware of research findings but far from overawed by the contributions of science and above all immensely practical. Anyone who wants to know how one of the world's outstanding clinicians appraises what child psychiatry has to offer could do no better than to read this book. Child psychiatry differs from general psychiatry in being concerned with a developing organism and it is entirely appropriate that the book begins with an account of child development and of the principal theories put forward to explain it. Chess and Hassibi recognize the importance of theory in organizing ideas and in suggesting explanations but they remain skeptical of how far existing theories do in fact account for the outstanding issues in development. They note the limitations of all theories in explaining how development takes place and why individual differences occur in the way they do.

Annual Progress in Child Psychiatry and Child Development 1983 Stella Chess, Alexander Thomas, 1983-12 A selection of the year's outstanding contributions to the understanding and treatment of the normal and disturbed child. *Explorations in Child Psychiatry* E. Anthony, 2013-11-11 It is a great pleasure for me to write a foreword to this fine work by many different collaborators under the aegis of my friend and one-time colleague in Geneva Dr E. James Anthony because it represents a collective effort toward a goal that today seems very necessary yet difficult to attain. This goal is the synthesis of developmental psychology with all the other aspects of child psychology into a science of ontogenetic development from birth to maturity encompassing three points of view: the biological, the behavioral, and the internalization of the behavioral into mental life. This synthesis is indeed necessary since it is not possible to understand a disorder or a developmental arrest without having a sufficient knowledge of the ensemble of elements that has brought it about. At each level of development the personality of the subject attempts to integrate a multiplex system of factors in varying proportion and without carefully and fully considering this interdigitating whole it is not easy to disentangle the mechanisms involved in any particular

functional disintegration
