National Library of Medicine

Current Catalog National Library of Medicine (U.S.), 1973 First multi year cumulation covers six years 1965-70 The Clinical Psychology of Aging Martha Storandt, Ilene C. Siegler, Merrill F. Elias, 2012-12-06 It has been estimated that there are at least 2 500 000 adults 10% of the population above age 65 who are currently in need of some sort of mental health services Kramer Taube and Redick 1973 Other estimates are even higher e.g. Pfeiffer 1977 It is expected that this number will increase as the number of older adults increases over the next 40 years Probably less than 400 clinical psychologists are now providing services to this age group The number of elderly patients actually seen by these psychologists is very very small One national survey found that of 353 psychologists who reported that they had older clients only 495 individuals were seen for psychological testing and 1423 for psychotherapy in the one month just prior to the response Dye in press Assuming that the same individuals were not seen for both testing and therapy within the one month period a questionable assumption approximately 08% of the at least two and one half million older adults in need of psychological services are now being supplied with these services in some form or another Thus the need for increased involvement of clinical psychology with the aged is undeniable However few resources currently exist which will serve to increase the number of clinical psychologists

trained to meet this need Probably less than 100 clinical psychologists living today have received any kind of formal graduate training in the clinical psychology of the aging Storandt 1977 *Mental Health: Psycho-Social Perspective* Anubhuti Dubey, Aradhana Shukla, 2021-01-01 This volume deals with the mental health issues of women in approximately all walks of life We have made our best attempts to shed light on each page of women's mental health and we are sure that we have achieved success We hope that this volume will be helpful for the researchers and mental health professionals *Men's Changing Roles in the Family* Robert A Lewis, Marvin B Sussman, 2014-05-01 How are men reacting to perceiving and behaving in light of the changes in gender roles Here is an important volume that provides new and interesting reading about contemporary husbands and fathers Men's Changing Roles in the Family offers an overview of the causes and consequences of changes in men's family roles in recent decades Experts introduce you to the issues problems and methods on the cutting edge of those disciplines that study men in the context of their families Until now relatively little has been known empirically about men in contemporary families and even less has been known about husbands and fathers from direct reports of the men themselves This groundbreaking volume successfully closes this gap in the literature with an examination of the effects that fathers growing involvement with their children have on their wives and themselves a clinical assessment of some men's angry reactions to separation and divorce and those special therapeutic goals and strategies that may help reduce their distress examinations of the conflicting demands of the work world and the family upon some contemporary husbands and fathers and the negative effects of nonstandard work schedules upon men's family life and an examination of factors that make many men unhappy in patriarchal family structures Men's Changing Roles in the Family also contributes toward breaking new ground by examining family roles now performed by special groups of men Finally this important volume reports empirical findings about men in family like relationships illustrating evidence for the unique roles that male caregivers can offer children in day care centers and reviewing current empirical studies of men's friendships and their development LC Science Tracer Bullet ,1972 **Research Grants Index** National Institutes of Health (U.S.). Division of Research Grants, 1968 **Contemporary Perspectives on Ageism** Liat Ayalon, Clemens Tesch-Römer, 2018-05-22 This open access book provides a comprehensive perspective on the concept of ageism its origins the manifestation and consequences of ageism as well as ways to respond to and research ageism The book represents a collaborative effort of researchers from over 20 countries and a variety of disciplines including psychology sociology gerontology geriatrics pharmacology law geography design engineering policy and media studies The contributors have collaborated to produce a truly stimulating and educating book on ageism which brings a clear overview of the state of the art in the field The book serves as a catalyst to generate research policy and public interest in the field of ageism and to reconstruct the image of old age and will be of interest to researchers and students in gerontology and geriatrics The Anatomy of Bereavement Beverley Raphael, 2003-12-16 First published in 1985 Routledge is an imprint of Taylor Francis an informa company
