Peptide Antigens A Practical Approach:

Peptide Antigens G. Brian Wisdom, 1994 Peptide antigens and anti peptide antibodies are widely used in biochemistry and molecular biology for the measurement location and purification of specific oligopeptides More recently the application of these reagents has expanded for example in the identification and mapping of the binding sites of antibodies and T cell receptors and in the identification and characterization of proteins which are known only by their primary structure This volume provides practical guidance to the major techniques used in the exploitation of peptide antigens and anti peptide antibodies The chapters give detailed protocols for the prediction of epitopes peptides synthesis the preparation of peptide immunogens immunoaffinity chromatography immunoassays and the mapping of epitopes using both synthetic peptides and phage display systems Peptide Antigens A Practical Approach covers all practical aspects of this important and growing subject It is a unique compendium of methods for workers in biochemistry molecular biology and immunology who need to use this technology in their research

The fourth Chinese Peptide Symposium hosted by Peking University was held at Chengdu, China, on July 21-25, 1996, with 164 participants including 45 scientists from abroad representing 12 countries. The four-day conference was both intense and spiritually rewarding. Our goal for CPS 96 was to provide a forum for the exchange of knowledge, cooperation, and friendship between the international and Chinese scientific communities, and we believe this goal was met. The symposium consisted of 10 sessions with 55 oral and 78 poster presentations including synthetic methods, molecular diversity, and peptide libraries; structure and conformation of peptides and proteins; bioactive peptides; peptide immunology; De Novo design and synthesis of proteins and peptides; ligand-receptor interactions; the chemistry-biology interface; and challenging problems in peptides. The enthusiastic cooperation and excellent contributions were gratifying, and the active response of the invited speakers contributed to the success of the symposium. The presentations were of excellent caliber and represented the most current and significant aspects of peptide science. Dr. James P. Tam and Dr. Jie Cheng Xu were the recipients of The Cathay Award sponsored by the H. H. Liu Education Foundation, offered for their seminal contributions in peptide science and the Chinese Peptide Symposium. Four outstanding young scientists were selected by the organizing committee to receive awards sponsored by Haikou Nanhai Pharmaceutical Industry Co. Ltd. Zhong He Group.

Peptide Science — Present and Future Yasutsugu Shimonishi, 2007-05-08

In the late 1980s, Peptide Societies were established in Europe, the United States, and Japan, and more recently in the Asian and the Pacific Rim regions including Australia, China, and Korea. At the time of the establishment of the American, European, and Japanese Peptide Societies, the International Liaison Organizing Committee, representing these Peptide Societies along with the Australian Peptide Society, began discussions for holding international conferences which would supercede or be held in lieu of the numerous individual meetings held by the peptide societies of each individual country or region. The representative of the Chinese Peptide Society participated in these discussions in the International Liaison Organizing Committee at the meeting of the American Peptide Symposium in Nashville in June 1997. After lengthy discussions over several years, we agreed to organize and host the International Peptide Symposium in Japan.

The First International Peptide Symposium IPS 97 was held on November 30 December 5 1997 in Kyoto and was co sponsored by four Peptide Societies The attendance at this Symposium was 550 participants including representatives from 32 different countries We were very pleased with this outcome and anticipate an even larger attendance for forthcoming Symposia in future years The revolution and advances in science and technology during the past two decades has caused traditional peptide chemistry to expand to peptide science spreading from physical science to biology pharmacology and medicine

Amino Acids and Peptides G. C. Barrett,D. T. Elmore,1998-10-29 This text is suitable for advanced undergraduate and beginning graduate students in chemistry and biochemistry studying amino acids and peptides The authors concentrate on amino acids and peptides without detailed discussions of proteins although the book gives all the essential background chemistry including sequence determination synthesis and spectroscopic methods to enable the reader to appreciate protein behaviour at the molecular level The approach is intended to encourage the reader to cross classical boundaries as in the later chapters on the biological roles of amino acids and the design of peptide based drugs For example there is a section on the enzyme catalysed synthesis of peptides with suitable examples an area often neglected in texts describing peptide synthesis This modern text will be of value in the amino acid peptide and protein field to advanced undergraduates graduate students and research workers

Amino Acids, Peptides and Proteins J S Davies,2007-10-31 Specialist Periodical Reports provide systematic and detailed review coverage of progress in the major areas of chemical research Written by experts in their specialist fields the series creates a unique service for the active research chemist supplying regular critical in depth accounts of progress in particular areas of chemistry For over 90 years The Royal Society of Chemistry and its predecessor the Chemical Society have been publishing reports charting developments in chemistry which originally took the form of Annual Reports However by 1967 the whole spectrum of chemistry could no longer be contained within one volume and the

series Specialist Periodical Reports was born The Annual Reports themselves still existed but were divided into two and subsequently three volumes covering Inorganic Organic and Physical Chemistry For more general coverage of the highlights in chemistry they remain a must Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry Some titles have remained unchanged while others have altered their emphasis along with their titles some have been combined under a new name whereas others have had to be discontinued The current list of Specialist Periodical Reports can be seen on the inside flap of this volume

Vaccines97 Cold Spring Harbor Laboratory,1997 Over its lifespan so far this annual series has traced the state of the art of vaccination from empiricism to molecular design In this work the investigation of immunogens at a structural level is especially prominent as is further exploration of DNA immunization ICN ICN Pharmaceuticals, inc,1999 *Prions and Mad Cow Disease* Brian K. Nunnally,Ira S.
