Connecting Abstract Algebra to Secondary Mathematics, for Secondary Mathematics Teachers Nicholas H. Wasserman, 2018-12-12 Secondary mathematics teachers are frequently required to take a large number of mathematics courses including advanced mathematics courses such as abstract algebra as part of their initial teacher preparation program and or their continuing professional development The content areas of advanced and secondary mathematics are closely connected Yet despite this connection many secondary teachers insist that such advanced mathematics is unrelated to their future professional work in the classroom This edited volume elaborates on some of the connections between abstract algebra and secondary mathematics including why and in what ways they may be important for secondary teachers Notably the volume disseminates research findings about how secondary teachers engage with and make sense of abstract algebra ideas both in general and in relation to their own teaching as well as offers itself as a place to share practical ideas and resources for secondary mathematics teacher preparation and professional development Contributors to the book are scholars who have both experience in the mathematical preparation of secondary teachers especially in relation to abstract algebra as well as those who have engaged in related educational research The volume addresses some of the persistent issues in secondary mathematics teacher education in connection to advanced mathematics courses as well as situates and conceptualizes different ways in which abstract algebra might be influential for teachers of algebra Connecting Abstract Algebra to Secondary Mathematics for Secondary Mathematics Teachers is a productive resource for mathematics teacher educators who teach capstone courses or content focused methods courses as well as for abstract algebra instructors interested in making connections to secondary mathematics

flexible resource to facilitate children's mathematical thinking. It looks at the potential relationship between story and mathematics and practically demonstrates how they can be combined to help children connect, understand and express mathematical ideas using story language. Written for all early years practitioners and students, the book offers a playful pedagogical approach to facilitating children's mathematical thinking, which brings a creative satisfaction and confidence to teaching mathematics. Encouraging a creative approach to teaching mathematics that draws on picture books and oral mathematical stories, the book shows you how to move from reading to telling stories with mathematical themes. Encourage children to pose and solve problems by playing with the plot of stories. Enable children to translate abstract mathematical ideas to concrete representations with supporting story props and puppets. Create original oral mathematical stories alongside children. Capture children's mathematical thinking in an observational framework supported with audio or video recordings which can be shared with parents and colleagues. There are free audio recordings of children and adults telling oral mathematical stories which feature in the book. These can be downloaded from www.routledge.com/9780415688154. This book draws on practical work with children, educators, parents, professional storytellers and trainee practitioners who bring theoretical ideas to life and offer insight into their mathematical story experiences. It is a must-have for all those who want to make mathematics relevant, accessible and imaginative for young children.

Mentoring Mathematics Teachers Rosalyn Hyde, Julie-Ann Edwards, 2013-09-23. Designed to support both teachers and university-based tutors in mentoring pre-service and newly qualified mathematics teachers at both primary and secondary levels, *Mentoring Mathematics Teachers* offers straightforward practical advice that is based on practice underpinned by research and geared specifically towards this challenging subject area. Developed by members of The Association of Mathematics Education Teachers, the authors draw upon the most up-to-date research and theory to provide evidence-based practical guidance. Themes covered include the recognition of the importance of pedagogical content knowledge, building upon subject knowledge, developing skills of self-evaluation in order to reflect and develop your own practice, the on-going need to address issues of equity and diversity within the profession, the need for pre-service teachers and their mentors to work together effectively as a partnership, the importance of collaboration, shared goals, mutual benefit and growth. Addressing issues of mentoring for all trainee and practising mathematics teachers, *Mentoring Mathematics Teachers* demonstrates both the importance of mentoring in the development of new teachers of mathematics but also the benefits to all those who involve themselves in this challenging and rewarding task.
