Knowledge in STEM Stephen Miles Uzzo,Sherryl Browne Graves,Erin Shay,Marisa Harford,Robert Thompson,2018-10-25 This volume represents both recent research in pedagogical content knowledge PCK in science technology engineering and math STEM as well as emerging innovations in how PCK is applied in practice The notion of research to practice is critical to validating how effectively PCK works within the clinic and how it can be used to improve STEM learning As the need for more effective educational approaches in STEM grows the importance of developing identifying and validating effective practices and practitioner competencies are needed This book covers a wide range of topics in PCK in different school levels middle school college teacher training teacher professional development and different environments museums rural The contributors believe that vital to successful STEM education practice is recognition that STEM domains require both specialized domain knowledge as well as specialized pedagogical approaches The authors of this work were chosen because of their extensive fieldwork in PCK research and practice making this volume valuable to furthering how PCK is used to enlighten the understanding of learning as well as providing practical instruction This text helps STEM practitioners researchers and decision makers further their interest in more effective STEM education practice and raises new questions about STEM learning *Play and Exploration in Children and Animals* Thomas G. Power,1999-11-01 Play is a paradox Why

would the young of so many species the very animals at greatest risk for injury and predation devote so much time and energy to an activity that by definition has no immediate purpose This question has long puzzled students of animal behavior and has been the focus of considerable empirical investigation and debate In this first comprehensive and state of the art review of what we have learned from decades of research on exploration and play in children and animals Power examines the paradox from all angles Covering solitary activity as well as play with peers siblings and parents he considers the nature development and functions of play as well as the gender differences in early play patterns A major purpose is to explore the relevance of the animal literature for understanding human behavior The nature and amount of children s play varies significantly across cultures so the author makes cross cultural comparisons wherever possible The scope is broad and the range multidisciplinary He draws on studies by developmental researchers in psychology and other fields ethologists anthropologists sociologists sociolinguists early childhood educators and pediatricians And he places research on play in the

context of research on such related phenomena as prosocial behavior and aggression Finally Power points out directions for further inquiry and implications for those who work with young children and their parents Researchers and students will find Play and Exploration in Children and Animals an invaluable summary of controversies methods and findings practitioners and educators will find it an invaluable compendium of information relevant to their efforts to enrich play experiences **Play**
