

PROBLEM-BASED LEARNING

DEFINITION

Problem-based learning (PBL) is an instructional method where students learn through the active exploration and resolution of real-world challenges or problems. It emphasizes self-directed research, collaboration, and critical thinking, with educators often playing the role of facilitators rather than traditional lecturers.

EXAMPLES

- **Inquiry:** PBL has overlaps with inquiry-based learning, where the teacher presents a problem and the students must develop a study to inquire about answers.
- **Solving a riddle:** The teacher presents students with a riddle, which they must work together to solve, using clues spread around the classroom.
