Holding the Line Ian Townsend Gault,Heather Nora Nicol,2005 This volume contains contributions from twenty four scholars concerning the significance and implications of the world s borderlands in economic political and socio cultural contexts Together these essays explore the changing role of borders in a global world Are borders increasingly irrelevant under conditions of globalization or can a case be made to demonstrate their continuing importance at various levels of spatial activity Situating itself within a growing border literature *Holding the Line* argues that contemporary borders facilitate parallel processes of globalization and localization of political activity As such the essays adopt a holistic approach to understanding the impact of boundaries on both society and space They demonstrate that any attempt to create a methodological and conceptual framework for the understanding of boundaries must be concerned with the process of bounding rather than simply the means through which the physical lines

of separation are delimited and demarcated This approach renders the notion of a borderless world highly problematic because the latter ignores the important and ongoing relationship between the functional role of borders in the bounding process and the symbolic role of borders as imagined social political and economic constructions embedded within a geographical text The changing characteristics of political boundaries during an era of globalization has become a great focus of interdisciplinary study and this book will appeal to scholars of political geography border studies and international relations
