Why It's OK to Be a Moderate Marcus Arvan, 2025-03-17

Conservatives and progressives rarely agree on much but one thing many agree upon is that it's not OK to be a moderate This book shows they are wrong In *Why It's OK to Be a Moderate* Marcus Arvan shows how many of history's worst evils have resulted from far right and far left radicalism how escalating conflicts between conservatives and progressives are undermining democracy and how many widely hailed social and political achievements have been achieved by moderates and radicals working in constructive tension with each other Using

philosophy science and historical analysis Arvan shows that critics of moderates tend to equate them with spineless centrists but that most moderates aren't centrists falling into diverse categories across the political spectrum Arvan then shows that although radicals tend to be popular in their era many of them have gone down in infamy while many moderates like Abraham Lincoln or Clement Attlee have endured short term unpopularity to make history Arvan shows that it's OK to be a moderate precisely because not everyone should be one He makes this case to you showing that whatever your reasonable political ideology may be things tend to go best politically when radicals and moderates effectively complement each other's virtues while counterbalancing the other's vices Key Features Uses science and historical analysis to show that while liberals and conservatives may have some political virtues radicals on both sides of the political spectrum tend to display twelve political vices that undermine democracy Explores how Aristotle's idea of the Golden Mean and Buddhism's Middle Way might be used to better understand far left and far right mistakes in the UK US Continental Europe and India Shows how moderates are a leading political demographic existing in greater numbers than liberals or conservatives while falling into diverse categories across the political spectrum Documents how radicalism has underwritten many of history's worst political events along with many of the most widely acknowledged political problems of the 20th and 21st centuries Demonstrates to the reader that things tend to go best politically when radicals and moderates work in constructive tension with each other and worst when there aren't enough moderates Why We Fight David Churchman, 2005 Why We Fight draws on more than 20 academic disciplines to describe more than 100 theoretical explanations for human aggression and conflict It also describes and assesses more than 70 methods for managing conflict including individual interpersonal community intellectual organizational intrastate and interstate conflict **Modes of Protest And Resistance** Margaret Betz, 2023-11-28 This book presents a philosophical analysis of the different forms of political resistance and protest It explores the normative space of resistance that is beyond self defense and civil disobedience and proposes the concept of resistance violence as a separate and special normative category Instances that fall under this category can be accordingly justified even if they prove to be practically ineffective by appealing to their role in preserving or upholding the dignity of the resisters or those who they aim to protect Margaret Betz draws from important and interesting historical examples to establish the concept and proposes to apply it to better understand contemporary struggles against injustice Power John Scott, 2014-04-03 This far reaching study gives a concise and coherent overview of the debates surrounding the analysis of social power The concept of power is outlined and its main dimensions are explored through consideration of various facets command pressure constraint discipline protest and interpersonal power The book examines both the theoretical debates that have arisen and the kinds of empirical materials relevant to them Topics covered include the nature of the contemporary state global economic power world systems business governance professional power social movements and family dynamics Power will be an indispensable introduction for students and researchers in sociology politics and the social sciences

Crime and Racial Constructions Jeanette Covington, 2010-04-12 *Crime and Racial Constructions: Cultural Misinformation about African Americans in Media and Academia* focuses on how film images of dangerous, hedonistic blacks have assumed greater significance since blacks protested racial injustice during the Civil Rights Movement and the Black Power Movement of the 1960s and 1970s. It does so by reviewing a number of films that have been released from the 1970s until the present in which black males are depicted as violent and threatening. It likewise considers how these same films represent black females as prostitutes, drug addicts and irresponsible, abusive mothers who spawn violence in their children. Because these on-screen images of a violent, apolitical and immoral black underclass find their way into the criminological literature, the book also takes a look at how criminologists use these images to link crime to underclass culture. Both Hollywood and criminologists alike manage to ignore how black activism during the 1960s social movements actually sparked black opposition to the kind of black-on-black crime that is routinely depicted on screen. By taking a critical look at these negative images, *Crime and Racial Constructions* seeks to correct some of the distortions that arise from the undue academic and cinematic focus on black criminals at the expense of racially conscious blacks.
