Repositioning Feminism And Education:

Repositioning Feminism & Education Janice Jipson, 1995-08-22 This book presents testimony of feminisms in process. The accounts are filled with tensions, not least an uneasiness with feminism itself and the question of what exactly it means to be a feminist in education in the contemporary world. It is their respect for their own differences and the honesty with which they write that makes this such a rich text. From the Foreword by Kathleen Weiler: Educators committed to social change face the common dilemma of how to take up the work of transformation without reinscribing systems of domination. The struggle with the concept of imposition is central to the emergence of many educators' identities and provides a site for exploring the complex relationship between power, knowledge and teacher identity. This book chronicles the collaborative efforts of five diverse women educators: Native American, European, Jewish American, rural, midwestern, working class, to grapple with the tensions of taking up a political position while honoring the cultural, social and historical context of others. Their dialogue across feminist, critical and postmodern theories and practices explores the process of fusing theory with political work in the world. What emerges is the continual repositioning and disruption of taken-for-granted meanings as central to enhancing emancipatory education.

Feminisms and Educational Research Wendy R. Kohli, Nicholas C. Burbules, 2011-12-29 Feminist theory has come a long way from its nascent beginnings; no longer can it be classified as liberal, socialist or radical. It has shaped and evolved to take on multiple meanings and forms, each distinct in its own perspective and theory. In *Feminisms and Educational Research*, the authors explore the various forms of feminisms, tracing their history and their relation to gendered knowledge and identity. Unlike other books on feminism, the authors do not attempt to push that a particular theory is more correct than another, but rather they give a complete overview of each of the forms of feminism. The authors then couple the philosophical and theoretical ideas of western feminisms with the aims and conduct of educational research, exploring how they interact and influence each other. Focusing on more recent feminists both in education and related disciplines, the book highlights illustrative examples from research to form a basis of understanding how the different feminisms have changed education.

Wendy R. Kohli, Nicholas C. Burbules, 2012-07-01 The latest book in the *Philosophy Theory and Educational Research* series introduces the main philosophical and theoretical ideas of recent western feminisms as it applies to educational research. Unlike other books that focus on these topics, the authors present a balanced overview of the issues instead of pushing a particular perspective.

Feminist Critical Policy Analysis: A perspective from primary and secondary schooling Catherine Marshall, 1997 **Feminist Critical Policy Analysis I** Catherine

Marshall, 2020-09-23 This text sets out to challenge the traditional power basis of the policy decision makers in education. It contests that others who have an equal right to be consulted and have their opinions known have been silenced, declared irrelevant, postponed and otherwise ignored. Policies have thus been formed and implemented without even a cursory feminist critical glance. The chapters in this text illustrate how to incorporate critical and feminist lenses and thus create policies to

meet the lived realities the needs aspirations and values of women and girls A particular focus is the primary and secondary sectors of education
