Richard A McCormick And The Renewal Of Moral Theology:

Richard A. Curran, 2019-02-15 In Charles E Curran's latest book *Diverse Voices in Modern US Moral Theology* he presents the diverse voices of US Catholic moral theologians from the mid twentieth century to the present The book discusses eleven key individuals in the development and evolution of moral theology as well as the New Wine New Wineskins movement This diversity which differs from the monolithic understanding of moral theology that prevailed until recently comes from the diverse historical circumstances or *Sitz im Leben* of the authors Each of these theologians developed her or his approach in light of these circumstances and in response to shifts in the three audiences of moral theology the Church the academy and the broader society By exploring this diversity Curran recognizes the deep divisions that exist within Catholic moral theology between the so called liberal and conservative approaches and acknowledges the need for greater dialogue between them providing a deeper understanding of the methods and approaches of these significant figures This new book from a major figure in the field will be an important resource for students and scholars of US Catholic moral theology and for anyone seeking to understand the current state of moral theology in America today

A History of Catholic Moral Theology in the Twentieth Century James F. Keenan, 2010-01-17 This is an historical survey of 20th Century Roman Catholic Theological Ethics also known as moral theology The thesis is that only through historical investigation can we really understand how the most conservative and negative field in Catholic theology at the beginning of the 20th could become by the end of the 20th century the most innovative one The 20th century begins with moral manuals being translated into the vernacular After examining the manuals of Thomas Slater and Henry Davis Keenan then turns to three works and a crowning synthesis of innovation all developed before during and soon after the Second World War The first by Odon Lottin asks whether moral theology is adequately historical Fritz Tillmann asks whether it's adequately biblical and Gerard Gilman whether it's adequately spiritual Bernard Haering integrates these contributions into his *Law of Christ* Of course people like Gerald Kelly and John Ford in the US are like a few moralists elsewhere classical gate keepers censoring innovation But with *Humanae vitae* and successive encyclicals bishops and popes reject the direction of moral theologians At the same time moral theologians like Josef Fuchs ask whether the locus of moral truth is in continuous universal teachings of the magisterium or in the moral judgment of the informed conscience In their move toward a deeper appreciation of their field as forming consciences they turn more deeply to local experience where they continue

their work of innovation Each continent subsequently gives rise to their own respondents In Europe they speak of autonomy and personalism in Latin America liberation theology in North America Feminism and Black Catholic theology and in Asia and Africa a deep post colonial interculturatism At the end I assert that in its nature theological ethics is historical and innovative seeking moral truth for the conscience by looking to speak crossculturally

Catholic Moral Theology in the United States Charles E. Curran, 2008-04-11 In this magisterial volume Charles E Curran surveys the historical development of Catholic moral theology in the United States from its 19th century roots to the present day He begins by tracing the development of pre Vatican II moral theology that with the exception of social ethics had the limited purpose of training future confessors to know what actions are sinful and the degree of sinfulness Curran then explores and illuminates the post Vatican II era with chapters on the effect of the Council on the scope and substance of moral theology the impact of Humanae vitae Pope Paul VI s encyclical condemning artificial contraception fundamental moral theology sexuality and marriage bioethics and social ethics Curran s perspective is unique For nearly 50 years he has been a major influence on the development of the field and has witnessed first hand the dramatic increase in the number and diversity of moral theologians in the academy and the Church No one is more qualified to write this first and only comprehensive history of Catholic moral theology in the United States

Morality Truly Christian, Truly African Paulinus Ikechukwu Odozor C.S.Sp., 2014-11-15 Given the largely Eurocentric nature of moral theology in the history of the Roman Catholic Church what will it take to invest the theological community in the history and moral challenges of the Church in other parts of the world especially Africa What is to be gained for the whole Church when this happens in a deep and lasting way In this timely and important study Paulinus Ikechukwu Odozor brings greater theological clarity to the issue of the relationship between Christianity and African tradition in the area of ethical foundations He also provides a constructive example of what fundamental moral

theology done from an African and Christian especially Catholic moral theological point of view could look like Following a brief history of the development of African Christian theology Odozor examines responses of African theologians to African tradition and Christian responses to the reality of non Christian religions In a context where the African religious experience and heritage are powerful sources of meaning and identity Christian evangelization raises questions both about the African primal religions and about Christianity itself and its claims Odozor takes up the subject of moral reasoning in an African Christian theological ethics and concludes with case studies that show how the African Church has tried to inculturate moral discourse on a religiously pluralistic continent and relate the healing gospel message to African situations Students and scholars of moral theology and ethics and church leaders will profit from the issues raised in *Morality Truly Christian Truly African*

of Scripture the relevance of history the debate on moral norms the relevance of social sciences to moral discourse the theory of natural moral law and the relation between the theologian and the magisterium This work therefore locates the theology of Bujo in the development of moral theology after the Second Vatican Council The author establishes a relation between African traditional religions African history Christology natural moral law moral autonomy debate the encyclical Veritatis Splendor and political liberation theological ethics *Rethinking Cooperation with Evil* Ryan Connors, 2023-12-15

Rethinking Cooperation with Evil A Virtue Based Approach applies Thomistic virtue theory to today's most challenging questions of cooperation with evil For centuries moralists have struggled to determine the conditions necessary to justify moral cooperation with evil The English Jesuit Henry Davis even observed 'There is no more difficult question than this in the whole range of Moral Theology' This important book addresses this challenge by applying the virtue based method of moral reasoning of St Thomas Aquinas to issues of cooperation with evil Those who pastor souls report frequently receiving questions from attentive believers about whether a particular human action inadvertently contributes to some moral evil Examples of potentially immoral cooperation with evil include whether one may shop at a particular franchise known for its support of abortion whether Catholics may attend civil marriages outside the Church or whether an organization may submit to government mandates that health insurance include payment for immoral practices Although recent moralists have tackled specific topics related to cooperation with evil agreement on an overall common paradigm has not yet been reached

Rethinking Cooperation with Evil proposes a method for Christian believers and others to approach these questions from the foundation of the thought of St Thomas Aquinas and the magisterial teaching of the Catholic Church This text provides both an overall method for how to understand the issue of cooperation as well as practical counsel for specific cases *Rethinking Cooperation with Evil* advances the theological conversation on this topic from both speculative and practical vantage points To facilitate his argument Connors utilizes historical analyses that contrast Aquinas's method of moral reasoning with that of the casuist treatment of cooperation Consequently the book includes numerous case studies that will be of interest both to moral theologians and readers new to the topic
