Seal Wars Twentyfive Years On The Front Lines:

Seal Wars Paul Watson,2003 Captain Paul Watson founding member of the Greenpeace Foundation writes of his twenty five years attempting to save the Canadian harp seal from slaughter and extinction **From Environmental Action to Ecoterrorism?** Gerry Nagtzaam,2017-01-27 This book scrutinizes the growth of the eco terrorism movement operating on a global scale focusing on the main groups and their more radical offshoots both historically and those currently active These include Earth First the Earth Liberation Front the Animal Liberation Front and the Sea Shepherd Conservation Society It critically examines how these groups form and how they have evolved their key personnel their strategies and tactics principles motivating philosophies and attitudes to violence Specifically the book seeks to understand whether such groups inevitably evolve from activists to militants to terrorists as the literature suggests Lastly it considers the future of such groups asking whether they will become more prominent as more people become ecologically aware and as global environmental conditions deteriorate or whether such groups have peaked as a force for environmental change The Animal Liberation Front Steven Best,Anthony J. Nocella,2011-06 The actions of the Animal Liberation Front ALF constitute one of the most misunderstood components of the animal advocacy movement in the U K and U S Not so much an organization as an ever changing cluster of individuals who free animals from laboratories farms and other animal confinement facilities the ALF has been by turns romanticized and vilified hounded and lionized In this detailed introduction to the ALF which constitutes the opening chapter of their edited volume Terrorists or Freedom Fighters academics Steve Best and Anthony Nocella place the ALF in the context of other liberation and social justice movements and examine its stated commitment to nonviolence and the forces arrayed against it The result is a potent polemical and passionately engaged study of activism in an age of terror laws and fearmongering **Seal** Victoria Dickenson,2015-11-15 Playful and inquisitive seals have long been interested in humans and humans have reciprocated that interest falling for their beauty grace and charm as they frolic alongside our boats or loll on sandy shores In this newest entry in the Animal series Victoria Dickenson traces the history of our interaction with these beautiful fascinating swimmers from the centuries of hunting in which people killed countless seals for their skin oil and meat to the present when the white furred baby seal has become one of the most potent symbols of the need for ecological conservation Along the way she offers an approachable account of seal biology and behavior and she delineates the threats they face from habitat destruction and climate change Beautifully illustrated and packed with stories from folklore myth and history Seal offers a richly immersive view of a much loved storied creature A Fate Worse Than Death Britt Lind,2021-08-18 As a homicide detective Rosemaria Baker is known for her street smarts her feisty personality and her ability to nail the bad guys Being the daughter of a cop and an actress gave little Rosemaria a dichotomous view of life Her mother was inclined to get lost in her fantasies while her father had to face the harsh realities of a world filled with murder and mayhem Nine year old Rosemaria loved both her parents and admired her

mother's talent but even at a young age she felt drawn to her father's work as a detective constantly begging him to share with her every detailed description of the dangerous criminals and close calls he survived while chasing the bad guys. Whatever Rosemaria did she did it well be it hitting baseballs shooting baskets writing school papers she put her all into every endeavor. When tragedy invaded her world at the tender age of ten she survived because of her innate ability to compartmentalize her feelings and move forward. While still in college she was faced with a terrifying situation where she had to use all of her mental and physical capabilities in an effort to save her father's life. Ignoring what would have been safe and expected of her and asking no one's advice she risked everything to find him and bring him home alive. **For the Wild**

Sarah M. Pike, 2017-10-03 *For the Wild* explores the ways in which the commitments of radical environmental and animal rights activists develop through powerful experiences with the more than human world during childhood and young adulthood. The book addresses the question of how and why activists come to value nonhuman animals and the natural world as worthy of protection. Emotions and memories of wonder, love, compassion, anger, and grief shape activists' protest practices and help us understand their deep rooted dedication to the planet and its creatures. Drawing on analyses of activist art, music, and writings as well as interviews and participant observation in activist communities, Sarah M. Pike delves into the sacred duties of these often misunderstood and marginalized groups with openness and sensitivity. Oceans

Participant, Jon Bowermaster, 2010-03-23 This unique tie in to the major motion picture *Oceans* coming this April from Disney National Geographic explores the health of our oceans and what we can do to improve it. More than 75 percent of the globe is covered by the oceans. It is sometimes difficult to understand why it is called Planet Earth rather than Planet Ocean. Since half the world's human population lives within a stone's throw of an ocean coastline, the oceans' health is increasingly important. Rich with resources and potential as a source of renewable energy, new drugs, drinking water for years we have treated them as both infinite and undamageable. But they are not. Over fishing, climate change, pollution, acidification, and more have put the world's oceans and marine life at great risk. *Oceans* gathers some of the most insightful visionaries, explorers, and ocean lovers: marine biologists, politicians, environmentalists, fishermen, sportsmen, deep divers, and more in a unique anthology in which each speaks to a unique aspect of our world's most dimly understood dimension. The Longest Struggle

Norm Phelps, 2007 Tells the story of animal exploitation. Follows the development of animal protection from the ancient world through the Enlightenment, the anti vivisection battles of the Victorian Era, and the birth of the modern animal rights movement with the publication of Peter Singer's *Animal Liberation*. Environmentalism of the Rich

Peter Dauvergne, 2018-02-09 What it means for global sustainability when environmentalism is dominated by the concerns of the affluent: eco business, eco consumption, wilderness preservation. Over the last fifty years, environmentalism has emerged as a clear counterforce to the environmental destruction caused by industrialization, colonialism, and globalization. Activists and policymakers have fought hard to make the earth a better place to live. But has the environmental movement actually brought

about meaningful progress toward global sustainability Signs of global unsustainability are everywhere from decreasing biodiversity to scarcity of fresh water to steadily rising greenhouse gas emissions Meanwhile as Peter Dauvergne points out in this provocative book the environmental movement is increasingly dominated by the environmentalism of the rich diverted into eco business eco consumption wilderness preservation energy efficiency and recycling While it s good that for example Barbie dolls packaging no longer depletes Indonesian rainforest and that Toyota Highlanders are available as hybrids none of this gets at the source of the current sustainability crisis More eco products can just mean more corporate profits consumption and waste Dauvergne examines extraction booms that leave developing countries poor and environmentally devastated with the ruination of the South Pacific island of Nauru a case in point the struggles against consumption inequities of courageous activists like Bruno Manser who worked with indigenous people to try to save the rainforests of Borneo and the manufacturing of vast markets for nondurable goods for example convincing parents in China that disposable diapers made for healthier and smarter babies Dauvergne reveals why a global political economy of ever more more growth more sales more consumption is swamping environmental gains Environmentalism of the rich does little to bring about the sweeping institutional change necessary to make progress toward global sustainability **Avarice** Britt Lind, 2025-08-22 An awesome read that should be made into a film Readers Favorite Taking a long awaited holiday in Pacific Beach California ex cop now prosecutor Rosemaria Baker and her fianc singer songwriter Josh Sibley are enjoying the sun and each other anticipating a few days of focusing on the good things in life but their vacation is interrupted by an attempt on Rosemaria s life The assassins escape while Rosemaria is hospitalized severely injured The police cast a wide net and clues lead them to investigate suspects amongst the wealthy denizens of Beverly Hills former roommates who lived in drug infested squalor in the worst part of Hollywood and criminals Rosemaria helped convict Working with her ex homicide detective father and her former partners in the Beverly Hills Police Department Rosemaria helps track down possible offenders who have fled California while all her instincts tell her that the person who wants her dead is much closer to home
