Searching For Higher Ground:

Searching for Higher Ground Steve Josse, 1998 Searching for Higher Ground George Glean, 2022-04-29 Is the Grass Greener on the Other Side Growing up Sinclair didn't understand why so many islanders wanted to escape to England or any other place besides Grenada He soon learned that no one wanted to remain on the island because work was scarce and wages were low Not only did West Indians run away to England but to wherever they could find work Even Sinclair's parents traveled to London with his brother and two sisters leaving him to be raised by an adopted aunt and uncle It was a challenge for Sinclair Would he ever understand why he was left behind Would he survive the trauma Would he ever see his family again It's this kind of dilemma many West Indians faced in searching for higher ground Fundamentals of Search and Rescue Donald C. Cooper, 2005 This book provides an overview of all aspects of search and rescue procedures and equipment It teaches the absolutely essential techniques employed by nearly all search and rescue personnel This book offers an in depth and practical approach to search and rescue and is recommended for all emergency responders For both paid and unpaid professionals this resource combines dynamic features with the latest comprehensive content **The Search for the Lost Riverfront: The New Orleans campaign of 1814-1815 and the Chalmette battlefield** Ted Birkedal, 2009 Originally commissioned in 1984 this report deals with the historical geography and archeology of the Battle of New Orleans during the War of 1812 as it pertained to the Chalmette Battlefield It touches upon how people put the battlefield to use after the War of 1812 as a place for generations of people as they live work and play Also covered are some of the things both bad and good we have done over the years to commemorate the battle and remember this important event in our nation's past

Search and Rescue United States. Department of the Air Force, 1985 **Searching Hearts** Ewel Vaughan, 2007-10 Join the Marrs family as they explore some of the most pressing questions in life How exactly did we come to be what we are today What are modern day miracles Through the story of one ordinary family and the not so ordinary events of their lives author Ewel Vaughan takes readers on a journey of discovery where exciting theories about our world our humanity and our destiny add to our search for truth The human heart wants answers *Searching Hearts* points the way **In Search Of Robinson Crusoe** Tim Severin, 2009-07-21 For nearly three centuries Robinson Crusoe has been the archetypal castaway the symbol of survival in uninhabited wilds In this book Tim Severin adds this enterprising hero to the roster of legendary figures whose adventures he's replicated and whose origins he's explored With the signature approach to literary and historical sleuthing that has led the New York Times to describe him as original audacious and exuberant Severin uncovers the seaman's world that captured Daniel Defoe's imagination recounting dramatic survival stories of sailors pirates castaways and native Americans and replicating their journeys to experience for himself the adventures that inspired Robinson Crusoe He camps on islands that famous castaways once survived on undertakes a perilous sea voyage and searches Nicaragua and Honduras for the Miskutu Indians the tribe that the model for Crusoe's companion Friday belonged

to Tim Severin has once again demonstrated a superb ability to bring together literature history and adventure in an engrossing narrative

In Search of Human Nature Carl N. Degler, 1992-11-05 Winner of the Pulitzer Prize in History in 1972 and a past president of both the Organization of American Historians and the American Historical Association Carl Degler is one of America's most eminent living historians. He is also one of the most versatile. In a forty-year career he has written brilliantly on race *Neither Black Nor White* which won the Pulitzer Prize, women's studies *At Odds* which Betty Friedan called a stunning book, Southern history *The Other South*, the New Deal and many other subjects. Now in *The Search for Human Nature* Degler turns to perhaps his largest subject yet a sweeping history of the impact of Darwinism and biological research on our understanding of human nature providing a fascinating overview of the social sciences in the last one hundred years. The idea of a biological root to human nature was almost universally accepted at the turn of the century. Degler points out then all but vanished from social thought only to reappear in the last four decades. Degler traces the early history of this idea from Darwin's argument that our moral and emotional life evolved from animals just as our human shape did to William James's emphasis on instinct in human behavior then seen as a fundamental insight of psychology. We also see the many applications of biology from racism, sexism and Social Darwinism to the rise of intelligence testing, the eugenics movement and the practice of involuntary sterilization of criminals a public policy pioneered in America which had sterilization laws 25 years before Nazi Germany. One such law was upheld by Oliver Wendell Holmes's Supreme Court. Degler then examines the work of those who denied any role for biology who thought culture shaped human nature a group ranging from Franz Boas, Ruth Benedict and Margaret Mead to John B. Watson and B. F. Skinner. Equally important he examines the forces behind this fundamental shift in a scientific paradigm arguing that ideological reasons especially the struggle against racism and sexism in America led to this change in scientific thinking. Finally Degler considers the revival of Darwinism without the Social Darwinism racism and sexism led first by ethologists such as Karl von Frisch, Nikolaas Tinbergen, Konrad Lorenz and Jane Goodall who revealed clear parallels between animal and human behavior and followed in varying degrees by such figures as Melvin Konner, Alice Rossi, Jerome Kagan and Edward O. Wilson as well as others in anthropology, political science, sociology and economics. What kind of animal is *Homo sapiens* and how did we come to be this way? In this wide-ranging history Carl Degler traces our attempts over the last century to answer these questions. In doing so he has produced a volume that will fascinate anyone curious about the nature of human beings.

The Search for Tactical Success in
