Seasons and Months Rosemond Tuve, 1976 **Seasons in the Literatures of the Medieval North P. S.** Langeslag, 2015 A fresh examination of how the seasons are depicted in medieval literature **Old English and Middle English Poetry** Derek Pearsall, 2019-06-27 Originally published in 1977 *Old English and Middle English Poetry* provides a historical approach to English poetry The book examines the conditions out of which poetry grew and argues that the functions that it was assigned are historically integral to an informed understanding of the nature of poetry The book aims to relate poems to the intellectual and formal traditions by which they are shaped and given their being This book will be of interest to students and academics studying or working in the fields of literature and history alike **The Middle English Romances of the Thirteenth and Fourteenth Centuries (Routledge Revivals)** Dieter Mehl, 2010-10-18 First published in English in 1968 this book provides a critical guide to the wide field of the Middle English Romances and gives a helpful survey of the contemporary state of scholarship Dr Mehl traces the development of Middle English Romances from the thirteenth to the end of the fourteenth century and interprets a number of these romances The emphasis is literary on their form and dominant themes rather than source material or language *Astrology, Almanacs, and the Early Modern English Calendar* Phebe Jensen, 2020-11-22 *Astrology Almanacs and the Early Modern English Calendar* is a handbook designed to help modern readers unlock the vast cultural religious and scientific material contained in early modern calendars and almanacs It outlines the basic cosmological astrological and medical theories that undergirded calendars traces the medieval evolution of the calendar into its early modern format against the background of the English Reformation and presents a history of the English almanac in the context of the rise of the printing industry in England The book includes a primer on deciphering early modern printed almanacs as well as an illustrated guide to the rich visual and verbal iconography of seasons months and days of the week gathered from material culture farming manuals almanacs and continental prints As a practical guide to English calendars and the social mathematical and scientific practices that inform them *Astrology Almanacs and the Early Modern English Calendar* is an indispensable tool for historians cultural critics and literary scholars working with the primary material of the period especially those with interests in astrology popular science popular print the book as material artifact and the history of time reckoning **Middle English Literature** Charles W. Dunn, Edward T. Byrnes, 2013-11-26 For the first time available in paperback this classic anthology provides readers with important literary works composed during the Middle English period 1100 1500 in England Scotland and Ireland The editors provide glosses for all unfamiliar words and obscure phrases and every selection refers to at least one definitive edition where details of recent scholarship can be found Modern punctuation and capitalization are used throughout and variant spellings are kept to a minimum to avoid unnecessary confusion The introduction discusses important literary and linguistic questions the headnotes and bibliography offer extensive guidance to secondary sources and the appendixes clarify pronunciation verb use

and dialect variations The Marvels of the World Rebecca Bushnell, 2021-03-12 Long before the Romantics embraced nature people in the West saw the human and nonhuman worlds as both intimately interdependent and violently antagonistic. With its peerless selection of ninety-eight original sources concerned with the natural world and humankind's place within it, *The Marvels of the World* offers a corrective to the still prevalent tendency to dismiss premodern attitudes toward nature as simple or univocal. Gathering together medical texts, herbals, and how-to books as well as scientific, religious, philosophical, and poetic works dating from antiquity to the dawn of the Enlightenment, the anthology explores both mainstream and unconventional thinking about the natural world. Its seven parts focus on philosophy and science, plants, animals, weather, and climate; ways of inhabiting the land; gardens and gardening; and European encounters with the wider world. Each section, and each of the book's selections, is prefaced with a helpful introduction by volume editor Rebecca Bushnell that weaves connections among these compelling pieces of the past. The early writers collected here wrote with extraordinary openness about ways of coexisting with the nonhuman forces that shaped them. Bushnell demonstrates even as they sought to control and exploit their environment. Taken as a whole, *The Marvels of the World* reveals how many of these early writers cared as much about the natural world as we do today. *A Cultural History of Gardens in the Medieval Age* Michael

Leslie, 2015-04-02 The Middle Ages was a time of great upheaval; the period between the seventh and fourteenth centuries saw great social, political, and economic change. The radically distinct cultures of the Christian West, Byzantium, Persia, and Islam, and al-Andalus resulted in different responses to the garden arts of antiquity and different attitudes to the natural world and its artful manipulation. Yet these cultures interacted and communicated, trading plants, myths, and texts. By the fifteenth century, the garden as a cultural phenomenon was immensely sophisticated and a vital element in the way society saw itself and its relation to nature. *A Cultural History of Gardens in the Medieval Age* presents an overview of the period with essays on issues of design, types of gardens, planting, use, and reception; issues of meaning, verbal and visual representation of gardens; and the relationship of gardens to the larger landscape. **A Walk in the Garden** Paul

Morris, Deborah Sawyer, 1992-05-01 This collection of essays by notable scholars offers a unique, multi-faceted approach to the understanding of the Garden story. Starting with the motifs, context, structure, and language of the biblical text itself, the chapters trace the Jewish and Christian exegetical traditions and developments in literature and iconography. This is an invaluable book for students and scholars of biblical studies, theology, literature, art history, and the psychology of religion.

Literary Lists Roman Alexander Barton, Eva von Contzen, Anne Rüggeheimer, 2023-05-23 This book provides a concise introduction to lists in literature from the early modern period to the twenty-first century. Tracing the changing functions of the literary list across time, it offers a broad range of case studies which situate selected enumerations in their respective contexts and demonstrate the versatility and creative potential of the list form. Starting with a review of previous research on the literary list, the book discusses four main constellations of enumeration: series and the great chain of being, itemization,

and enumerative realism letteracettera and experimental list making white noise and creative exploits of enumeration between formal playfulness and existential exploration The epilogue offers an analytical toolkit for the study of literary lists based on rhetorical theory
