The Man of Light in Iranian Sufism Henry Corbin, 1994 A penetrating analysis of the writings of the great Persian mystics on the quest for dawning light in the spiritual journey Suhrawardi Semnani Najm alDin Kubra and other Sufis

The Man of Light in Iranian Sufism Henry Eugène Corbin, *Sufism in the Secret History of Persia* Milad Milani, 2014-10-14 Sufism formed one of the cultures of resistance which has existed in the social fabric of Persia since antiquity Such resistance continues to manifest itself today with many looking to Sufism as a model of cooperation between East and West between traditional and modern Sufism in the Secret History of Persia explores the place of Sufi mysticism in Iran's intellectual and spiritual consciousness through traditional and contemporary Sufi thinkers and writers Sufism in the Secret History of Persia examines the current of spirituality which extends from the old Iranian worship of Mithra to modern Islam This current always contains elements of gnosis and inner knowing but has often provided impetus for socio political resistance The study describes how these persisting pre Islamic cultural and socio religious elements have secretly challenged Muslim orthodoxies and continue to shape the nature and orientation of contemporary Sufism *Catching the Thread* Llewellyn Vaughan-Lee, Irina Tweedie, 1998-07-10 A pioneering work integrating the traditional wisdom of the Sufis with the insights of Jungian psychology **The Way of the Beloved** Robert Arsdale, Diana Van Arsdale, 2016-11-18 The foundation of the Way of the Beloved is discovered in the heart of love itself where there lives and moves a will to exaltation of the other To truly love another is to will the spiritual ideal upon that beloved one When there is a mutual intention to exalt infusing the daily life of a man and woman they enter into the Way of the Beloved This handbook is an attempt to put into book form what authors Robert and Diana Van Arsdale have been teaching to small groups of couples since 1976 Their workshops offer an ageless set of protocols for the transformation of the love relationship between a woman and a man into a path of spiritual development Here they present an integrated body of progressive experiential exercises and meditations that were taught originally taught by Herman Rednick Simply stated The Way of the Beloved teaches a couple how to actualize the potential of their relationship through the intensification of love and compassion Designed for couples in search of spiritual and emotional exploration this guide offers methods intended to help them realize a vision of love fulfilled The Superhumanities Jeffrey J. Kripal, 2024-05-31 A bold challenge to rethink the humanities as intimately connected to the superhuman and to decolonize reality itself One of the foremost historians of religion and a consummate storyteller Kripal makes a compelling case for restoring the anomalous and inexplicable to the heart of inquiry in the humanities A must read for anyone interested in the future of education society and indeed reality and for all who have experienced or would like to experience amazement Priscilla Wald author of *Contagious Cultures Carriers and the Outbreak Narrative* What would happen if we reimaged the humanities as the superhumanities If we acknowledged and celebrated the undercurrent of the fantastic within our humanistic disciplines entirely new cultural worlds and meanings would become possible That is Jeffrey J

Kripal's vision for the future to revive the suppressed dimension of the superhumanities which consists of rare but real altered states of knowledge that have driven the creative processes of many of our most revered authors, artists, and activists. In Kripal's telling, the history of the humanities is filled with precognitive dreams, evolving superhumans, and doubled selves. The basic idea of the superhuman for Kripal is at the core of who and what the human species has tried to become over millennia and around the planet. After diagnosing the basic malaise of the humanities that the truth must be depressing, Kripal shows how it can all be done differently. He argues that we have to decolonize reality itself if we are going to take human diversity seriously. Toward this pluralist end, he engages psychoanalytic, Black critical feminist, postcolonial, queer, and ecocritical theory. He works through objections to the superhumanities while also recognizing the new realities represented by the contemporary sciences. In doing so, he tries to move beyond naysaying practices of critique toward a future that can embrace those critiques within a more holistic view, a view that recognizes the human being as both a social, political animal as well as an evolved cosmic species that understands and experiences itself as something super. An electrifying, glorious, loving, and almost deranged romp through humanity's greatest recurrent ideas and experiences. *The Superhumanities* is for anyone who senses that the transformative power of books, ideas, and spiritual experiences are intertwined and too often estranged. Jonathan Haidt, author of *The Righteous Mind: Why Good People Are Divided by Politics and Religion*. **Sufi Commentaries on the Qur'an in Classical Islam** Kristin Sands, 2006-07-13 Meeting the ever-increasing interest in Islam and Sufism, this book is the first comprehensive study of Sufi Qur'anic commentaries and includes translations of many writings previously unavailable in English. It examines the shared hermeneutical assumptions of Sufi writers and the diversity in style of Sufi commentaries. Some of the assumptions analyzed are: the Qur'an is a multi-layered and ambiguous text open to endless interpretation; the knowledge of deeper meanings of the Qur'an is attainable by means other than transmitted interpretations and rational thought; the self is dynamic, moving through states and stations which result in different interpretations at different times. The styles of Sufi commentaries are explored, which range from philosophical musings to popular preaching to literary narrative and poetry. Other commentaries from the classical period are also investigated to provide context in understanding Sufi approaches and exegetical styles. *Romanticism & Esoteric Tradition* Paul Davies, 1998 Spiritual quest is at the very heart of poetry, but in our materialistic climate, as we begin the twenty-first century, this has been largely forgotten, even by those who claim to be experts in interpreting literature. How does the worldview common to the main esoteric traditions of East and West correspond to the aims of Romantic poets such as Shelley, Keats, Blake, Coleridge, and Wordsworth? In *Romanticism and Esoteric Tradition*, Paul Davies maintains that the intended meaning of the poetry and thinking of the Romantics can be understood only in the light of the spiritual teachings of those traditions. This is one of the few books that connects the creative nature of poetry to the core teachings of the esoteric tradition. It reveals the true meaning of several Romantic writers whose works have been trivialized by a culture that has marginalized the

spiritual and bound itself only to material historical and social concerns The author also shows that the Romantics were the first Western poets to imagine the relationship of the self to the environment as personal encounter In this sense the Romantics recalled a long held secret of the esoteric human sciences rather than inventing a new one This book brings the deepest interests of the Romantics directly into contact with issues closest to present day students of the spiritual traditions and holistic perspectives *The Making of Rhodesia* Hugh Marshall Hole,2018-10-24 Initially published in 1926 this book seeks to clear some misconceptions of Southern and Northern Rhodesia at the time of the evolution of British colonies that bear the name of Rhodes their founder The author who lived there for twenty three years used official records and reports original photographs and his friends and his own narrative to tell this story [Aziz Nasafi](#) Lloyd Ridgeon,2020-11-25 Shows Nasafi and his legacy in a new light Nasafi s works are of particular interest because they contain valuable descriptions of the different Islamic world views of the age Includes substantial extracts to help illuminate this perceptive study of a neglected figure in the pantheon of Sufi thinkers *The Oxford Handbook of Religion and Emotion* John Corrigan,2008-01-02 The academic study of religion recently has turned to the investigation of emotion as a crucial aspect of religious life Researchers have set out in several directions to explore that new terrain and have brought with them an assortment of instruments useful in charting it This volume collects essays under four categories religious traditions religious life emotional states and historical and theoretical perspectives In this book scholars engaged in cutting edge research on religion and emotion describe the ways in which emotions have played a role in Buddhism Christianity Judaism Islam and other religions They analyze the manner in which key components of religious life ritual music gender sexuality and material culture represent and shape emotional performance Some of the essays included here take a specific emotion such as love or hatred and observe the place of that emotion in an assortment of religious traditions and cultural settings Other essays analyze the thinking of figures such as St Augustine Soren Kierkegaard Jonathan Edwards Emile Durkheim and William James This collection offers a range of critical perspectives on the academic study of religion and emotion in the form of syntheses provocations and prospective observations that will inform the work of those already engaged in the field Taken together the writings included in this handbook serve as an ideal entry point for anyone wishing to familiarize themselves with the new academic study of religion and emotion [Jesus Christ, Sun of God](#) David Fideler,1993-10-01 The early Christian Gnosis did not spring up in isolation but drew upon earlier sources In this book many of these sources are revealed for the first time Special emphasis is placed on the Hellenistic doctrine of the Solar Logos and the early Christian symbolism which depicted Christ as the Spiritual Sun the illumination source of order harmony and spiritual insight Based on 15 years of research this is a unique book which throws a penetrating light on the secret traditions of early Christianity It clearly demonstrates that number is at the heart of being Jesus Christ Sun of God illustrates how the Christian symbolism of the Spiritual Sun is derived from numerical symbolism of the ancient divinities **The Only Tradition** William W. Quinn

Jr.,1997-02-06 The Only Tradition examines the first principles of the perennial philosophy or ancient wisdom tradition as expressed in the writings of Ren Gu non and Ananda K Coomaraswamy and the current breakdown of value meaning and culture in the West due to the decline of these principles since the thirteenth century The book further focuses on the relationship or reciprocity between the first principles and Western and Eastern culture and discusses the future development of a homogenous worldwide system of belief that would restore value and meaning to people s lives Quinn argues for a return to the first principles inherent in the perennial philosophy which constitute the sacred primordial Tradition and which inform all the world s great religious traditions His book makes an excellent introduction to this powerful current of European esoteric thought primordial tradition **Green Man, Earth Angel** Tom

Cheetham,2012-02-01 Green Man Earth Angel explores the central role of imagination for understanding the place of humans in the cosmos Tom Cheetham suggests that lives can only be completely whole if human beings come to recognize that the human and natural worlds are part of a vast living network and that the material and spiritual worlds are deeply interconnected Central to this reimagining is an examination of the place of language in human life and art and in the worldview that the prophetic religions Judaism Christianity and Islam presuppose If human language is experienced only as a subset of a vastly more than human whole then it is not only humans who speak but also God and the world with all its creatures If humans internal poetry and creative imaginations are part of a greater conversation then language can have the vital power to transform the human soul and the soul of the world itself **Religion after Religion** Steven M.

Wasserstrom,1999-11-15 By the end of World War II religion appeared to be on the decline throughout the United States and Europe Recent world events had cast doubt on the relevance of religious belief and modernizing trends made religious rituals look out of place It was in this atmosphere that the careers of Scholem Eliade and Corbin the twentieth century s legendary scholars in the respective fields of Judaism History of Religions and Islam converged and ultimately revolutionized how people thought about religion Between 1949 and 1978 all three lectured to Carl Jung s famous Eranos circle in Ascona Switzerland where each in his own way came to identify the symbolism of mystical experience as a central element of his monotheistic tradition In this the first book ever to compare the paths taken by these thinkers Steven Wasserstrom explores how they overturned traditional approaches to studying religion by de emphasizing law ritual and social history and by extolling the role of myth and mysticism The most controversial aspect of their theory of religion Wasserstrom argues is that it minimized the binding character of moral law associated with monotheism The author focuses on the lectures delivered by Scholem Eliade and Corbin to the Eranos participants but also shows how these scholars generated broader interest in their ideas through radio talks poetry novels short stories autobiographies and interviews He analyzes their conception of religion from a broadly integrated comparative perspective sets their distinctive thinking into historical and intellectual context and interprets the striking success of their approaches Colour, Art and Empire Natasha Eaton,2013-10-28 Colour Art and

Empire explores the entanglements of visual culture enchanted technologies waste revolution resistance and otherness The materiality of colour offers a critical and timely force field for approaching afresh debates on colonialism This book analyses the formation of colour and politics as qualitative overspill Colour can be viewed both as central and supplemental to early photography the totem alchemy tantra and mysticism From the eighteenth century Austrian Empress Maria Theresa to Rabindranath Tagore and Gandhi to 1970s Bollywood colour makes us adjust our take on the politics of the human sensorium as defamiliarising and disorienting The four chapters conjecture how European Indian and Papua New Guinean artists writers scientists activists anthropologists or their subjects sought to negotiate the highly problematic stasis of colour in the repainting of modernity Specifically the thesis of this book traces Europeans admiration and emulation of what they termed Indian colour to its gradual denigration and the emergence of a space of exception This space of exception pitted industrial colours against the colonial desire for a massive workforce whose slave like exploitation ignited riots against the production of pigments most notably indigo Feared or derided the figure of the vernacular dyer constituted a force capable of dismantling the imperial machinations of colour Colour thus wreaks havoc with Western expectations of biological determinism objectivity and eugenics Beyond the cracks of such discursive practice colour becomes a sentient and nomadic retort to be pitted against a perceived colonial hegemony The ideological reinvention of colour as a resource for independence struggles make it fundamental to multivalent genealogies of artistic and political action and their relevance to the present

Temple & Contemplation Henry Corbin, 2013-10-28 First published in 1986 This volume brings together five lectures which were originally delivered at different sessions of the famous Eranos Conferences in Ascona Switzerland Henry Corbin himself had outlined the plan for this book whose title suggests that these diverse studies converge on a common spiritual centre

Old Tales and New Truths James Roy King, 1992-02-06 This guidebook to the Bright Shadow World develops three closely related issues The first is the position that fairytales and folktales are of value today because they encourage the growth of capabilities important in our postmodern world Each of us like the fairytale hero sets out on his her own quests seeks his her own identity faces his her own dilemmas with few resources but wit imagination and a certain power of improvisation King develops the implications of this situation for such common fairytale problems as learning to read the world productively navigating various kinds of edges exploiting power sources developing highly personal moral commitments problem solving and data collecting The second concern of this book is with the development of a system for analyzing narrative structure The formula offered here involves an examination of interactions among actors physical settings lines of force and power sources as a narrative moves toward its denouement This system facilitates the classifying and contrasting of narratives and illuminates the structure of both narrative and lived experience Finally this book is concerned with myth making or world making processes It is shown that traditional narrative actually points to and delineates another dimension of existence here called the Bright Shadow World that operates by rules of its own and may be

penetrated by individuals from our ordinary world Inferences about the Bright Shadow World drawn from traditional narrative are described and evaluated The Signs of God Llewellyn Vaughan-Lee,2001-04-06 The Signs of God explores the importance of mystical consciousness at this time of global transition In the depths of the heart is hidden the secret purpose of creation which is the key to our present time of transformation The work of the mystic is to make this key accessible to humanity and so open the doors of revelation The possibilities of the future are present but veiled the joy of life is waiting to return The mystic can help us to awaken to the oneness that is essential to life and to recognize the signs of God that will guide us and reveal our true purpose Pathways into the Jungian World Roger Brooke,2003-09-02 In Pathways into the Jungian World contributors from the disciplines of medicine psychology and philosophy look at the central issues of commonality and difference between phenomenology and analytical psychology The major theme of the book is how existential phenomenology and analytical psychology have been involved in the same fundamental cultural and therapeutic project both legitimize the subtlety complexity and depth of experience in an age when the meaning of experience has been abandoned to the dictates of pharmaceutical technology economics and medical psychiatry The contributors reveal how Jung's relationship to the phenomenological tradition can be and is being developed and rigorously show that the psychological resonance of the world is immediately available for phenomenological description
