sociology contemporary history and cultural studies *Rethinking Democratic Accountability* Robert D. Behn, 2004-05-26 Traditionally American government has created detailed formal procedures to ensure that its agencies and employees are accountable for finances and fairness Now in the interest of improved performance we are asking our front line workers to be more responsive we are urging our middle managers to be innovative and we are exhorting our public executives to be entrepreneurial Yet what is the theory of democratic accountability that empowers public employees to exercise such discretion while still ensuring that we remain a government of laws How can government be responsive to the needs of individual citizens and still remain accountable to the entire polity In *Rethinking Democratic Accountability* Robert D Behn examines the ambiguities contradictions and inadequacies in our current systems of accountability for finances fairness and performance Weaving wry observations with political theory Behn suggests a new model of accountability with compacts of collective mutual responsibility to address new paradigms for public management *The Challenges of Collaboration in Environmental Governance* Richard D. Margerum, Cathy J. Robinson, 2016-09-28 Collaborative approaches to governance are being used to address some of the most difficult environmental issues across the world but there is limited focus on the challenges of practice Leading scholars from the United States Europe and Australia explore the theory and practice in a range of contexts highlighting the lessons from practice the potential limitations of collaboration and the potential strategies for addressing these challenges *Social Accounting and Public Management* Stephen P. Osborne, Amanda Ball, 2010-10-18 Social accounting as a discipline has challenged the methodology and focus of the larger field of accounting over the last 50 years More recently it has taken on greater significance for other subjects as well addressing issues for public policy and management more broadly These include the issues of the nature of accountability in the contemporary plural state environmental and societal sustainability the ethical management and governance of public services and resources and the creation and sustenance of social capital as an essential element of the modern plural state *Social Accounting and Public Management* brings together for the first time researchers from a range of disciplines including accounting political science management sociology and policy studies to discuss and develop our knowledge and theory of the nature of accountability in contemporary global society and the challenges it may pose for public policy and management This book addresses this nexus of all of these issues and disciplines and through this makes a contribution to the development of the disciplines of both social accounting and public policy and management ***The Blind Spots of Public Bureaucracy and the Politics of Non-Coordination*** Tobias Bach, Kai Wegrich, 2018-05-29 How to better coordinate policies and public services across public sector organizations has been a major topic of public administration research for decades However few attempts have been made to connect these concerns with the growing body of research on biases and blind spots in decision making This book attempts to make that connection It explores how day to day decision making in public sector organizations is subject to different types of organizational attention biases that may lead to a variety of coordination problems in and between

organizations and sometimes also to major blunders and disasters The contributions address those biases and their effects for various types of public organizations in different policy sectors and national contexts In particular it elaborates on blind spots or not seeing the not seeing and different forms of bureaucratic politics as theoretical explanations for seemingly irrational organizational behaviour The book s theoretical tools and empirical insights address conditions for effective coordination and problem solving by public bureaucracies using an organizational perspective Madison's Managers Anthony M. Bertelli,E. Jr. Lynn,2006-05-01 A case for the constitutional roots of public administration Essential to the field as we develop new theories and applications in a postmodern America Political Studies Review Combining insights from traditional thought and practice and from contemporary political analysis Madison s Managers presents a constitutional theory of public administration in the United States Anthony Michael Bertelli and Laurence E Lynn Jr contend that managerial responsibility in American government depends on official respect for the separation of powers and a commitment to judgment balance rationality and accountability in managerial practice The authors argue that public management administration by unelected officials of public agencies and activities based on authority delegated to them by policymakers derives from the principles of American constitutionalism articulated most clearly by James Madison Public management is they argue a constitutional institution necessary to successful governance under the separation of powers To support their argument Bertelli and Lynn combine two intellectual traditions often regarded as antagonistic modern political economy which regards public administration as controlled through bargaining among the separate powers and organized interests and traditional public administration which emphasizes the responsible implementation of policies established by legislatures and elected executives while respecting the procedural and substantive rights enforced by the courts These literatures are mutually reinforcing the authors argue because both feature the role of constitutional principles in public management Madison s Managers challenges public management scholars and professionals to recognize that the legitimacy and future of public administration depend on its constitutional foundations and their specific implications for managerial practice **Crossing Boundaries in Public Management and Policy** Janine O'Flynn,Deborah Blackman,John Halligan,2013-07-24 In the 21st century governments are increasingly focusing on designing ways and means of connecting across boundaries to achieve goals Whether issues are complex and challenging climate change international terrorism intergenerational poverty or more straightforward provision of a single point of entry to government or delivering integrated public services practitioners and scholars increasingly advocate the use of approaches which require connections across various boundaries be they organizational jurisdictional or sectorial Governments around the world continue to experiment with various approaches but still confront barriers leading to a general view that there is considerable promise in cross boundary working but that this is often unfulfilled This book explores a variety of topics in order to create a rich survey of the international experience of cross boundary working The book asks fundamental questions such as What do we mean by the

notion of crossing boundaries Why has this emerged What does cross boundary working involve What are the critical enablers and barriers By scrutinizing these questions the contributing authors examine the promise the barriers the enablers the enduring tensions and the potential solutions to cross boundary working As such this will be an essential read for all those involved with public administration management and policy
