active roles of women in the periods of civil war 1854-76 and the commercialization of agriculture 1880-1910. It highlights their vigorous responses to the violence of revolution, their increased mobility, and their interaction with state reforms in the period from 1910 to 1940. The final essays focus on changing gender relations in the countryside under the impact of rapid urbanization and industrialization since 1940. Because histories of Latin American women have heretofore neglected rural areas, this volume will serve as a touchstone for all who would better understand women's lives in a region of increasing international economic importance. *Women of the Mexican Countryside* demonstrates that, contrary to the peasant stereotype, these women have accepted complex roles to meet constantly changing situations.

Technological Change and Industrial Transformation

Vicky Xiaoyan Long, Magnus Holmén, 2021-08-18 Industrial transformation is a research and teaching field with a focus on the phenomenon and mechanisms of industrial development and renewal. It concerns changes in economic activities caused by innovation, competition, and collaboration, and has a rich heritage of evolutionary economics, institutional economics, industrial dynamics, technology history, and innovation studies. It borrows concepts and models from the social sciences, sociology, history, political sciences, business management, economics, behavioural sciences, and also from technology and engineering studies. In this book, the authors present the key theories, frameworks, and concepts of industrial transformation and use empirical cases to describe and explain the causes, processes,

and outcomes of transformation in the context of digitalization and sustainability They stress that industrial transformation consists both of Darwinian survival of the fittest selection and of intentional pursuits of innovation and of industrial capabilities creation The work argues that managing the global trends of transformation is not only about new technology and innovation existing institutional settings and dynamic interactions between technological change organizational adaptation and economic activities also have a profound impact on future trajectories The areas under investigation are of great relevance for strategic management decisions and industrial and technology policies and understanding the mechanisms underlying transformation and sustainable growth

A Journey toward Influential Scholarship Xiao-Ping Chen, H. Kevin Steensma, 2021-10-12 In this volume twelve prominent management scholars provide retrospective accounts of their success Through these stories early stage and mid career scholars will gain insight on how to develop influential research and remain highly productive These insights include how to develop sharp observations of organizational phenomena how to ask important research questions and how to transform these questions into potentially fruitful realms of research The book also offers resources for developing essential collaborative relationships managing the peer review and publication process and disseminating findings
