**Modern Criminals** James F. Short, **Crime Stories** Todd Herzog, 2009 The Weimar Republic 1918-1933 was a crucial moment not only in German history but also in the history of both crime fiction and criminal science. This study approaches the period from a unique perspective, investigating the most notorious criminals of the time and the public's reaction to their crimes. The author argues that the development of a new type of crime fiction during this period, which turned literary tradition on its head by focusing on the criminal and abandoning faith in the powers of the rational detective, is intricately related to new ways of understanding criminality among professionals in the fields of law, criminology, and police science. Considering Weimar Germany not only as a culture in crisis, the standard view in both popular and scholarly studies, but also as a culture of crisis, the author explores the ways in which crime and crisis became the foundation of the Republic's self-definition. An interdisciplinary cultural studies project, this book insightfully combines history, sociology, literary studies, and film studies to investigate a topic that cuts across all of these disciplines.

**Conservation Criminology** Meredith L. Gore,2017-03-14 This important new text introduces conservation criminology as the interdisciplinary study of environmental exploitation and risks at the intersection of human and natural systems Taking an interdisciplinary approach the book enhances understanding of the various human and organizational behaviors that pose risks to the environment humans and drive conservation crime As human population growth global market economies climate change deforestation and illegal exploitation of natural resources continue to increase academic research from numerous disciplines is needed to address these challenges Conservation Criminology promotes thinking about how unsustainable natural resources exploitation is a cause and a consequence of social conflict Case studies profiled in the book demonstrate this cause and effect type situation as well as innovative approaches for reducing risks to people and the environment This text encourages readers to consider how humans behave in response to environmental risks and the various mechanisms that constitute effective and ineffective approaches to enforcement of wildlife crimes including environmental and conservation policy Case studies from the USA Latin America Africa and Asia highlight corruption in conservation global trade in electronic waste illegal fishing illegal logging human wildlife conflict technology and space water insecurity wildlife disease and wildlife poaching Taken together chapters expand the reader s

perspective and employ tools to understand and address environmental crimes and risks and to provide novel empirical evidence for positive change With established contributors providing interdisciplinary and global perspectives this book establishes a foundation for the emerging field of conservation criminology     Applications and Innovations in Intelligent Systems XIV Richard Ellis,Tony Allen,Andrew Tuson,2010-04-05 The papers in this volume are the refereed application papers presented at AI 2006 the Twenty sixth SGAI International Conference on Innovative Techniques and Applications of Artificial Intelligence held in Cambridge in December 2006 The papers present new and innovative developments in the field The series serves as a key reference as to how AI technology has enabled organisations to solve complex problems and gain significant business benefit     Regulating a New Society Morton Keller,1994 His final area of concern is one that assumed new importance after 1900 social policy directed at major groups such as immigrants blacks Native Americans and women     British Romantic Drama Terence Allan Hoagwood,Daniel P. Watkins,1998 The present volume attempts a systematic explanation of various dimensions of Romantic drama by foregrounding both the theoretical and practical questions bearing on Romantic drama in its historical situation In this effort the volume intentionally gravitates toward discussion of lesser known works of the period rather than such major dramas as Manfred or Prometheus Unbound This is because the poetic dramas by Byron and Shelley have already been the subject of many useful historicist investigations and also because lesser known works for instance the dramas of Scott Wordsworth s Borderers and the many revolutionary and counter revolutionary dramas of the period provide avenues into historical and ideological issues that cannot be adequately addressed by exclusive attention to dramas long recognized as canonical     Governing Through Crime Jonathan Simon,2007-02-03 Across America today gated communities sprawl out from urban centers employers enforce mandatory drug testing and schools screen students with metal detectors Social problems ranging from welfare dependency to educational inequality have been reconceptualized as crimes with an attendant focus on assigning fault and imposing consequences Even before the recent terrorist attacks non citizen residents had become subject to an increasingly harsh regime of detention and deportation and prospective employees subjected to background checks How and when did our everyday world become dominated by fear every citizen treated as a potential criminal In this startlingly original work Jonathan Simon traces this pattern back to the collapse of the New Deal approach to governing during the 1960s when declining confidence in expert guided government policies sent political leaders searching for new models of governance The War on Crime offered a ready solution to their problem politicians set agendas by drawing analogies to crime and redefined the ideal citizen as a crime victim one whose vulnerabilities opened the door to overweening government intervention By the 1980s this transformation of the core powers of government had spilled over into the institutions that govern daily life Soon our schools our families our workplaces and our residential communities were being governed through crime This powerful work concludes with a call for passive citizens to become engaged partners in the management of risk and the treatment of social ills Only by coming together to produce

security can we free ourselves from a logic of domination by others and from the fear that currently rules our everyday life
