H. Hayes,2017-07-28 This classic volume tells the story of nationalism the fusion of patriotism with ethnic consciousness It documents the emergence of nationalism in the modern world and the way that nationalism has become a substitute for religion over the past two centuries Nationalism for Hayes draws its power from cultural and social factors primarily language Second to language are historical forces that stem from an accumulation of a people s remembered or imagined experiences Hayes bases his observations on historic European examples He sees nationalism as a religion reacting against historic Christianity and the values of the Western tradition This combination of powerful forces stresses neither charity nor the brotherhood of man Historically it has rationalized selfishness intolerance and violence The growth of nationalism Hayes observed brings not peace but war As a testament to its timeless insight Nationalism remains an informative guide despite the failure of globalization the Internet and international communications and connectivity to move us beyond the bonds of nationalism Hayes s linking of the potent forces of nationalism and religion still rings true the insurgency in Ukraine the unrest in the Middle East and tribal conflicts in Africa are all undergirded by nationalist sentiments **The Crucified Nation** Alan Davies,2008 This book examines the nexus between religion and politics considered in one of its most controversial aspects The starting point is the 2001 attack on the United States which a Canadian commentator ingeniously described as the passion of America This designation suggested an interesting inquiry into other so called national passions the notion of the Christ nation crucified by evil powers because of its higher virtue This motif is explored by analysing five modern nationalisms that have employed Christian symbolism in this manner Poland France Germany Ireland and Palestine

The author investigates the way in which fundamental Christian concepts are distorted and corrupted in the process and points to the inherent dangers of this form of political self glorification Poets philosophers novelists and preachers have all played a major part in promoting the idea of the Christ nation at certain times mostly in the nineteenth century but also today Famous examples are Adam Mickiewicz in Poland Victor Hugo in France the patriotic Lutherans during the First World War in Germany Patrick Pearse in Ireland and certain Palestinian nationalist poets today The clash of cultures religions nationalism and civilisations in the world today is ever more strident The passion narratives of the five nations are interwoven with historical circumstance in order to cast light on the endurance and power of the narratives to arrive at a final critique and tract for the times

Nation and Religion Peter van der Veer, Hartmut Lehmann, 2020-10-06 Does modernity make religion politically irrelevant Conventional scholarly and popular wisdom says that it does The prevailing view assumes that the onset of western modernity characterized by the rise of nationalism the dominance of capitalism and the emergence of powerful state institutions favors secularism and relegates religion to the purely private realm This collection of essays on nationalism and religion in Europe and Asia challenges that view Contributors show that religion and politics are mixed together in complex and vitally important ways not just in the East but in the West as well The book focuses on four societies India Japan Britain and the Netherlands It shows that religion and nationalism in these societies combined to produce such notions as the nation being chosen for a historical task imperialism for example the possibility of national revival and political leadership as a form of salvation The volume also examines the qualities of religious discourse and practice that can be used for nationalist purposes paying special attention to how religion can help to give meaning to sacrifice in national struggle The book's comparative approach underscores that developments in colonizing and colonized countries too often considered separately are subtly interrelated In addition to the editors the contributors are Benedict R Anderson Talal Asad Susan Bayly Partha Chatterjee Frans Groot Harry Harootunian Hugh McLeod Barbara Metcalf and Peter van Rooden
