Heat and Alterity in Contemporary Dance Ananya Chatterjea,2020-10-28 This book

argues that contemporary dance imagined to have a global belonging is vitiated by euro white constructions of risk and currency that remain at its core Differently the book reimagines contemporary dance along a South South axis as a poly centric justice oriented aesthetic temporal category with intersectional understandings of difference as a central organizing principle Placing alterity and heat generated via multiple pathways at its center it foregrounds the work of South South artists who push against constructions of tradition and white centered aesthetic imperatives to reinvent their choreographic toolkit and respond to urgent questions of their times In recasting the grounds for a different global stage the argument widens its scope to indicate how dance making both indexes current contextual inequities and broader relations of social economic political and cultural power and inaugurates future dimensions of justice Winner of the 2022 Oscar G Brockett Prize for Dance Research
