**The Modern Invention of Medieval Music** Daniel Leech-Wilkinson, 2002-10-17 Medieval music has been made and remade over the past two hundred years For the nineteenth century it was vocal without instrumental accompaniment but with barbarous harmony that no one could have wished to hear For most of the twentieth century it was instrumentally accompanied increasingly colourful and increasingly enjoyed At the height of its popularity it sustained an industry of players and instrument makers all engaged in recreating an apparently medieval performance practice During the 1980s it became vocal once more exchanging colour and contrast for cleanliness and beauty But what happens to produce such radical changes of perspective And what can we learn from them about the way we interact with the past How much is really known about the way medieval music sounded Or have modern beliefs been formed and sustained less by evidence than the personalities of scholars and performers their ideologies and their musical tastes

The Invention of Discovery, 1500-1700 Dr James Dougal Fleming, 2013-05-28 The early modern period used to be known as the Age of Discovery More recently it has been troped as an age of invention But was the invention discovery binary itself invented or discovered This volume investigates the possibility that it was invented through a range of early modern knowledge practices centered on the emergence of modern natural science From Bacon to Galileo from stagecraft to math from martyrology to romance contributors to this interdisciplinary collection examine the period's generation of discovery as an absolute and ostensibly neutral standard of knowledge production They further investigate the hermeneutic implications for the epistemological authority that tends in modernity still to be based on that standard The Invention of Discovery 1500 1700 is a set of attempts to think back behind discovery considered as a decisive trope for modern knowledge
