Learning in the Knowledge Society Karen Jensen,Leif Chr. Lahn,Monika Nerland,2012-10-20 This book presents an entirely new approach to professional learning based on perspectives of the knowledge society and in particular an interpretation of Knorr Cetina s work on scientific epistemic cultures Starting with a conceptual chapter and followed by a suite of empirical studies from accountancy education nursing and software engineering the book elaborates how a knowledge production and circulation take distinct forms in those fields b how the knowledge objects of practice in those fields engross and engage professionals and in the process people and knowledge are transformed by this engagement By foregrounding an explicit concern for the role of knowledge in professional learning the book goes much farther than the

current fashion for describing practice based learning It will therefore be of considerable interest to the research policy practitioner and student communities involved with professional education learning or interested in innovation and knowledge development in the professions **Catalogue of the University of Michigan** University of Michigan,1934
