Chess Life ,1998 Attacking 101: Volume #005 Joel Johnson,2020 **The Double Queen's Gambit** Alexey

Bezgodov,2015-11-24 Alexey Bezgodov provides a complete chess opening repertoire for Black against 1 d4 After replying with 1 d5 the former Russian Chess Champion advises you to take up the Double Queen s Gambit and play 2 c5 against both 2 c4 and 2 Nf3 In The Double Queen s Gambit Black s attitude is as active and ambitious as that of White in the Queen s Gambit This ambition may seem premature at first sight but many strong grandmasters have already successfully played this system After thoroughly investigating and analysing this opening Bezgodov has gained a lot of experience in practical grandmaster play The system not only turned out to be playable but also brought him success and not just because of its surprise value Bezgodov s conclusion is that there is no clear and compelling way for White to reach an advantage The fresh ideas and the clear explanations in The Double Queen s Gambit may change your view on modern chess opening theory

Bezgodov provides dozens of exercises to test your understanding of his system *Bologan's Caro-Kann* Victor

Bologan,2018-06-20 The Caro Kann is one of the most important and popular responses to 1 e4 World champions Botvinnik Petrosian Karpov and Anand have played this reliable chess opening in many of their games Present day elite players such as Hikaru Nakamura and Fabiano Caruana are proving that the drawish reputation of the Caro Kann no longer holds in modern chess Victor Bologan presents a complete Caro Kann repertoire for Black that is much more than just a lucidly explained and highly playable set of responses In many lines Bologan provides as he has done in his other recent major chess opening books for New In Chess two options to handle the Black position Bologan s explanations are accessible for a wide range of players and he provides the reader with a thorough grounding in the strategic and tactical motifs During his research Bologan has found many new ideas and resources After reading and studying this book you are bound win many exciting games with Bologan s Caro Kann *Winning Chess Manoeuvres* Sarhan Guliev,2015-11-04 When a chess master finds a winning

strategic idea it is seldom by accident An amateur staring at a position on the chess board is often fumbling in the dark his head spinning with a multitude of general rules and vague notions The master s approach is concrete He knows how and where to look because he has studied the games of other masters Sarkhan Guliev presents a wide range of strategic manoeuvres that have been repeatedly employed by great chess players He shows how masters generate ideas from the games of other masters positional sacrifices amazing counterplay concepts unorthodox exchanges winning with h2 h4 overcoming a blockade the advantages of double pawns the e5 pawn wedge the uses of the queen bishop battery and much more After studying this book chess amateurs will find winning strategic manoeuvres quicker and more often They will not find them by accident or by relying on general principles but because they have built up a large stockpile of highly practical ideas **Catastrophes & Tactics in the Chess Opening - Volume 9: Caro-Kann & French** Carsten Hansen,2018-03-31

WINNING FAST IS FUN This book is a collection of games played by the best players in the world in which either White or

Black wins in 15 moves or less either a result of brilliant chess tactics an accumulation of mistakes or blunders Through the study of the games in this volume you will improve your opening play opening repertoire strategies and tactical ability The chess opening variations in this volume are all the variations of the Caro Kann what is it that is causing a player to go so wrong that he or she loses within 15 moves or 25 moves as in my Chess Miniatures Series The games in this book illustrate the making of and punishment of a lot of typical mistakes Loose pawns pieces Not calculating far enough Over burdened pieces Overlooked intermediary moves Miscalculations Not sensing danger And much more of that kind But the names also include a surprising amount of tactics see the front cover White to move sometimes even missed tactical opportunities I have chosen only from games of players that were rated 2350 and above or would have rated as such but it was before the rating system was put in place because I felt that if mistakes like these can be played by such strong players then there are lessons to be learned for the majority of the rest us Further I sorted away the worst games such as when one side a piece is threatened and the other side forgets to move a threatened piece even that happens among strong players Through the study of the games in this book should help you avoid a lot of mistakes in your own games help you to take advantage of the mistakes of your opponents and ultimately sharpen your tactics and tactical awareness by answering the prompts to the diagrammed positions Enjoy

Chess Tactics - Volume 2 Carsten Hansen, The follow up to the internationally bestselling volume 1 Are you ready to seriously improve your game It has been said that chess is 99% tactics but whether that is an accurate reflection is hard to tell Nevertheless it is important But if you are like most players you only discover the tactics after you come home and run through your game with a chess engine So what to do In the present book you will be challenged 404 times but unlike most tactics puzzle books you don't know what your objective is do I need to find a mate find an opportunity skewer or pin a piece use a tactical turn to gain a positional advantage and how far do I need to calculate These questions are you are faced with when you play your own games and therefore this book tries to replicate this position Your one advantage over the players in the respective positions is that you know that there is supposed to be something in there for you to find The puzzles vary a lot in difficulty some are relatively easy some are incredibly difficult but most are somewhere in between However most of the puzzles are layered so that even when you think the answer is obvious it is worth looking further because your idea may be the decoy left there for you to get distracted from the actual solution Working through the puzzles and then carefully play through the thoroughly annotated solutions will help you to up your tactical radar as well as your calculation skills So if you are up for the challenge here is the opportunity to take the leap forward Good luck
