## **Private Practices:**

**Private Practices** Naoko Wake, 2011-03-09 *Private Practices* examines the relationship between science, sexuality, gender, race, and culture in the making of modern America between 1920 and 1950 when contradictions among liberal intellectuals affected the rise of U.S. conservatism. Naoko Wake focuses on neo-Freudian gay psychiatrist Harry Stack Sullivan, founder of the interpersonal theory of mental illness. She explores medical and social scientists' conflicted approach to homosexuality, particularly the views of scientists who themselves lived closeted lives. Wake discovers that there was a gap, often dramatic, frequently subtle, between these scientists' public understanding of homosexuality as a disease and their personal, private perception, which questioned such a stigmatizing view. This breach revealed a modern culture in which self-awareness and open-mindedness became traits of mature gender and sexual identities. Scientists considered individuals of society lacking these traits to be immature, creating an unequal relationship between practitioners and their subjects. In assessing how these dynamics, the disparity between public and private views of homosexuality and the uneven relationship between scientists and their subjects, worked to shape each other, *Private Practices* highlights the limits of the scientific approach to subjectivity and illuminates its strange career, sexual subjectivity in particular, in modern U.S. culture. **Private Practices** Meredith Cherland, University of Regina, Saskatchewan, Canada., 2013-10-23 First Published in 1994. The study of literacy no longer focuses solely on psychological processes. In the past ten years, literacy has been reconceptualized as a social practice or rather as social practices that make up the fabric of daily life. Using an anthropological perspective, *Private Practices* examines the broad fictional reading of middle-class pre-teen girls and offers fresh insights into the place of literacy both at home and at school in the construction of gender. The author provides a wealth of evidence to support the central assumption of the book: Gender is a cultural and social construction, not a biological given. Gender is something that people create while interacting with each other in all the practices of their daily lives, including their literacy practices. The book also provides critical analysis and commentary concerning the role that reading fiction plays in cultural reproduction. In the hope that deeper knowledge of literacy as a social practice will support social transformation and eventually social justice, the author suggests compelling reasons for the fact that girls read more fiction and different fiction than do boys. **Private Practices** Meredith Rogers Cherland, 1994. A constructed world: Gender practices, Literacy practices, Instructional practices, Identity practices, Private lessons. **Women's Private Practices of Knowledge Production in Early Modern Europe** Natacha Klein Käfer, Natália da Silva Perez, 2023-12-29 This open access book explores knowledge practices by five women from different European contexts. Contributors document, analyze, and discuss how women employed practices of privacy to pursue knowledge that did not necessarily conform with the curriculum prescribed for them. The practices of Jane Lumley in England, Camila Herculaniana in Padua, Victorine de Chastenay in Paris, as well as Elisabeth Sophie Marie and Philippine Charlotte in Brunswick-Wolfenbützel, will help us to exemplify the delicate balance between audacity and obedience that

women had to employ to be able to explore science literature philosophy theology and other types of learned activities Cases range from the sixteenth to the nineteenth century presenting continuities and discontinuities across temporal and geographical lines of the strategies that women used to protect their knowledge production and retain intact their reputations as good Christian daughters wives and mothers Taken together the essays show how having access to privacy the ability to regulate access to themselves while studying and learning was a crucial condition for the success of the knowledge activities these women pursued This is an open access book
