

MRCP : ANATOMY & INDICATIONS

Radiology For The Mrcp

Richard Graham, Ferdia Gallagher

Radiology For The Mrcp:

Radiology for the MRCP Graham Whitehouse, John Curtis, 1998-10-30 AI The MRCP is the membership exam for the Royal College of Physicians so it is essential that anyone wanting to practice hospital medicine passes it. It comes in two parts and radiology is covered in the second of these. Radiology covers the interpretation of all imaging modalities and techniques such as MRI and CT. Radiology for the MRCP is a self-assessment book for MRCP candidates comprising 180 questions each with 1 or 2 black and white images and detailed highly organized explanatory answers. The emphasis of the book is on clinical cases commonly featured in the MRCP examinations and on the new imaging modalities with which physicians need to be familiar but find gaining experience difficult. Answers are structured to reflect how answers should be presented to examiners in the various components of the MRCP Part 2 picture tests, short cases, long case, clinical Viva. Candidates can practise and assess their interpretation skills across a wide range of clinical conditions. *Radiology for the MRCP* Jeremy Hughes, Michael Hughes, Iain D. Lyburn, 2000 This new book will be invaluable in preparing for the difficult test of the Part 2 examination and in giving the physician confidence in interpreting a wide range of radiological imaging. **Radiology for MRCP** Sarah J. Howling, 2003 This updated edition of Radiology for MRCP includes 30 new cases, improved illustrations, new Magnetic Resonance Imaging (MRI), Computer Tomography (CT) and other new techniques to ensure close relevance to the exam. **Radiology for the MRCP** Nicola Strickland, 1997-09 **Radiology for MRCP** Sarah Howling, 2005 *Radiology Cases for the MRCP* Vincent Williamson, Debra King, 1999 MRCP candidates are required to have a basic knowledge of radiological interpretation as it applies to clinical practice. Radiology Cases for the MRCP comprises 90 typical clinical cases which may be part of the photographic section of the MRCP Part 2 examination or may require interpretation during a short or long clinical case. The answers include discussion points in the format of a clinical or oral examination and clinical symptoms and signs are included wherever appropriate. **Radiology of the Pancreas** Guy Delorme, Albert L. Baert, Lieven Van Hoe, 2012-12-06 Radiology of the Pancreas discusses the diagnostic role of the various imaging modalities currently available for the assessment of pancreatic anatomy and disease. In comparison with the first edition, new technical developments: helical CT, ultrafast magnetic resonance imaging, color Doppler ultrasound, laparoscopic ultrasound have been included and several chapters have been significantly expanded. With the aid of numerous illustrations, the normal radiological anatomy, anatomical variants, the typical and atypical radiological features of both common and uncommon diseases and potential pitfalls are considered in depth. All of the chapters have been written by recognized experts in the field and the book should be of value to all radiologists and other specialists who treat patients with pancreatic disease or who have an interest in the subject. **Magnetic Resonance Cholangiopancreatography (MRCP)** Riccardo Manfredi, Roberto Pozzi Mucelli, 2013-11-19 This book, based on the experience of a single large referral center, presents the characteristic findings obtained when using MR imaging and MR cholangiopancreatography (MRCP) to image the biliary tree and pancreatic

ducts in a variety of disease settings An introductory chapter is devoted to technical considerations anatomy and developmental anomalies Subsequent chapters then present in detail the MR imaging and MRCP findings observed in choledocholithiasis inflammatory and neoplastic disorders of the bile ducts acute and chronic pancreatitis according to etiology and different pancreatic neoplasms Dynamic MRCP with secretin stimulation is also illustrated documenting both normal and abnormal responses of the pancreatic duct system to secretin Readers will find this book to be an excellent aid to the interpretation of MR imaging and MRCP findings in patients with biliary and pancreatic disease *Get Through Radiology for MRCP Part 2* Gurmit Singh, Hugh Montgomery, 2007-09-28 For the MRCP Part 2 exam candidates need to be able to interpret radiological images of commonly encountered conditions They also increasingly need to be able to answer other questions about the condition shown in the image for example treatment and prognosis This book has been designed to meet that need It is divided into five sections chest abdomen nervous system cardiovascular system and musculoskeletal system Each condition described is illustrated by one or two high quality radiological images and then provides a concise but holistic view of the condition with all the important aspects of disease that the candidate will be expected to know This information is supplemented by a short series of example exam questions **Get Through MRCP Part 2** Gurmit Singh, 2007 Grainger & Allison's Diagnostic Radiology E-Book Andy Adam, Adrian K.
