

Gardeners work with an ever-receding ideal of perfection; no sooner is something growing well than they see how to place it better or give it a better neighbor. To other's eyes, all may look as well as could be expected, but a good gardener's eye sees more to be improved.

The Evangelical Conversion Narrative D. Bruce Hindmarsh,2005-03-18 In the seventeenth and eighteenth centuries thousands of ordinary women and men experienced evangelical conversion and turned to a certain form of spiritual autobiography to make sense of their lives This book traces the rise and progress of conversion narrative as a unique form of spiritual autobiography in early modern England After outlining the emergence of the genre in the seventeenth century and the revival of the form in the journals of the leaders of the Evangelical Revival the central chapters of the book examine extensive archival sources to show the subtly different forms of narrative identity that appeared among Wesleyan Methodists Moravians Anglicans Baptists and others Attentive to the unique voices of pastors and laypeople women and men Western and non Western peoples the book establishes the cultural conditions under which the genre proliferated

Conrad and Gide Russell West-Pavlov,2023-04-17 This study examines the relations between the work of the Polish English novelist Joseph Conrad and the French Nobel Prize winner Andr Gide Gide s translation of Conrad s Typhoon is read as a work belonging paradoxically to the oeuvres of both writers where their respective preoccupations meet with illuminating results Focusing also on other major works by Conrad and Gide the study suggests that the intertextual and personal interaction between these two masters of 20th Century fiction was governed by processes of identification and projection conflict between master and disciple and a consequent resistant reading of texts and confrontation with linguistic and cultural heterogeneity Issues of translation theory psychoanalysis and intertextuality are brought together to offer a glimpse of a possible dialogue between literature and ethics This study will be of interest to students and researchers in English French and Comparative Literature

The Very Late Goethe Charlotte Lee,2017-07-05 Goethe s career was an unusually long and productive one he became a literary celebrity in the 1770s and remained so until his death in 1832 The distinguishing feature of his last works is their self consciousness their preoccupation both with the business of writing and with personal development In the first cross genre study of this period of Goethe s work Charlotte Lee traces the theme in his last major poems and autobiographical writings before turning to the two giants Wilhelm Meisters Wanderjahre and Faust II All these works share a tendency to allude subtly to earlier moments from Goethe s own literary output but to fashion them into writing which is quite new even though or perhaps because he himself is old This book seeks to understand the unique perspective of one nearing the end of a long life

Culture and Enlightenment Paul Crittenden,2017-11-22 This title was first published in 2002 Culture and Enlightenment are the two

words that best characterise the essence of Gy rgy Markus s career in whose honour this book is published Markus devoted the last twenty years of research towards a theory of cultural objectivations and their pragmatics and the great depth of his knowledge of the history of culture and philosophy informs all his teaching and writing The pursuit of Enlightenment ideals attains reflective self consciousness in Markus works forged in the knowledge of its own historicity of the embeddedness of rationalities in culture and in an awareness of the paradoxes that cling to the conscious affirmation of ideals which are no longer self evident or beyond questioning In taking up the challenge of these paradoxes Markus spans the whole history of modern philosophy and culture with a matchless authority This book draws together contributions from leading figures in contemporary philosophy who are also friends colleagues and former students of Gy rgy Markus The book is divided into two sections the first presents critical assessments of various aspects of Markus wide ranging works the second presents contributions in celebration of his influence and his wide interests In their critical assessment of Markus work and in the demonstration of his influence the contributors hope to convey something of the breadth and something of the excitement of doing philosophy in the company of Gy rgy Markus *Fashion Cultures* Stella Bruzzi,Pamela Church Gibson,2013-10-18

The Nemesis of Docility Edmond Holmes,1916 **Light** ,1918 *The Ohio Educational Monthly* ,1921 **Weighty Issues** Jeffery Sobal,2017-09-08 Many people consider their weight to be a personal problem when then does body weight become a social problem Until recently the major public concern was whether enough food was consistently available As food systems began to provide ample and stable amounts of food questions about food availability were replaced with concerns

about ideal weights and appearance These interests were aggregated into public concerns about defining people as too fat and too thin Social constructionist perspectives can contribute to the understanding of weight problems because they focus attention on how these problems are created maintained and promoted within various social environments While there is much objectivist research concerning weight problems few studies address the socially constructed aspects of fatness and thinness This book however draws from and contributes to social constructionist perspectives The chapters in this volume offer several perspectives that can be used to understand the way society deals with fatness and thinness The contributors consider historical foundations medical models gendered dimensions institutional components and collective perspectives These different perspectives illustrate the multifaceted nature of obesity and eating disorders providing examples of how a variety of social groups construct weight as a social problem

The Anorexic Self Paula Saukko, 2008-05-08 Critically examines diagnostic and popular discourses on eating disorders

Objectivity has a history and it is full of surprises In *Objectivity* Lorraine Daston and Peter Galison chart the emergence of objectivity in the mid nineteenth century sciences and show how the concept differs from alternatives truth to nature and trained judgment This is a story of lofty epistemic ideals fused with workaday practices in the making of scientific images From the eighteenth through the early twenty first centuries the images that reveal the deepest commitments of the empirical sciences from anatomy to crystallography are those featured in scientific atlases the compendia that teach practitioners of a discipline what is worth looking at and how to look at it Atlas images define the working objects of the sciences of the eye snowflakes galaxies skeletons even elementary particles Galison and Daston use atlas images to uncover a hidden history of scientific objectivity and its rivals Whether an atlas maker idealizes an image to capture the essentials in the name of truth to nature or refuses to erase even the most incidental detail in the name of objectivity or highlights patterns in the name of trained judgment is a decision enforced by an ethos as well as by an epistemology As Daston and Galison argue atlases shape the subjects as well as the objects of science To pursue objectivity or truth to nature or trained judgment is simultaneously to cultivate a distinctive scientific self wherein knowing and knower converge Moreover the very point at which they visibly converge is in the very act of seeing not as a separate individual but as a member of a particular scientific community Embedded in the atlas image therefore are the traces of consequential choices about knowledge persona and collective sight *Objectivity* is a book addressed to any one interested in the elusive and crucial notion of objectivity and in what it means to peer into the world scientifically
