Reproduction In Poultry:

Reproductive Technologies in Farm Animals Ian Gordon, 2004 In the past half century great progress has been made in the reproductive management of farm animals both mammals and birds This book aims to review developments and indicate which reproductive technologies can be used commercially or in research It begins by discussing artificial insemination and how this has recently been refined in semen sexing technology Embryo transfer in vitro embryo production technology and the control of oestrus and ovulation are then reviewed Subsequent chapters consider the control of postpartum ovarian activity seasonal breeding multiple births and litter size pregnancy testing parturition and the onset of puberty The author then describes more recent developments in cloning and the production of transgenic animals before a final chapter on suppressing reproductive activity

Reproduction in Farm Animals E. S. E. Hafez, B. Hafez, 2013-05-13 When you re looking for a comprehensive and reliable text on large animal reproduction look no further the seventh edition of this classic text is geared for the undergraduate student in Agricultural Sciences and Veterinary Medicine In response to reader feedback Dr Hafez has streamlined and edited the entire text to remove all repetitious and nonessential material That means you ll learn more in fewer pages Plus the seventh editing is filled with features that help you grasp the concepts of reproduction in farm animals so you ll perform better on exams and in practice condensed and simplified tables so they re easier to consult an easy to scan glossary at the end of the book an expanded appendix which includes graphic illustrations of assisted reproduction technology Plus you ll find valuable NEW COVERAGE on all these topics Equine Reproduction expanded information reflecting today s knowledge Llamas NEW CHAPTER Micromanipulation of Gametes and In Vitro Fertilization NEW CHAPTER Reach for the text that s revised with the undergraduate in mind the seventh edition of Hafez s Reproduction in Farm Animals

Reproduction in Poultry Ifeanyi Charles Okoli, Michael Uwaezuoke Iloeje, Ifeanyi Princewill Ogbuewu, 2021-02-05 Poultry is an integral part of animal agriculture and they provide the human population with products such as meat and eggs In poultry production as with other livestock systems a high level of reproductive performance is absolutely crucial to efficient production In order to manage poultry reproduction and the specific problems that arise it is important to understand the underlying physiology of the reproductive process Thus this book aims to provide an integrated overview of the subject of poultry reproduction describing the normal function of the reproductive system The book is designed to provide a general background to the field of poultry reproduction for postgraduate and undergraduate students and a reference source for research scientists and professional workers in the field related to the production of animal products The book will serve as an introductory text to veterinary students embarking on a career in reproductive physiology research Furthermore we hope that it will be used by working veterinarians and farmers to update themselves on new research findings and developments in the management of poultry reproduction Since the mid the 19th century several studies characterizing the anatomy and physiology of the male and female reproductive systems of poultry have been

conducted This book focuses mainly on the review of current literature on physiological mechanisms regulating reproduction with emphasis on poultry species It describes the basic structures and functions of the male and female reproductive tracts including the sex organs testis ovary excurrent ducts accessory organs oviducts shell gland and vagina The endocrine glands that control reproduction in poultry were also described The process of sperm production and egg formation are discussed including highlights of the recent literature on factors that affect spermatozoa production and function The basic fundamental structure and chemical characteristics of the eggs were defined Key elements of the egg production are discussed including synthesis and transfer of egg yolk constituents the formation of the egg yolk in the ovary development of oocytes and ovulation the formation of egg white and chalazae the formation of eggshell and oviposition This section also described in detail the sperm egg binding sperm acrosome reaction and protease enzymes required for the hole formation in the perivitelline membrane and the development of the diploid zygote emanated from the fusion of the nuclei from both male and female gametes The editors have succeeded in bringing together many renowned poultry reproduction experts to review the current body of knowledge in poultry reproduction and are grateful to all the authors for their state of the art compilation of the most recent development in this field We feel that we have achieved our goal of producing an outstanding book with the top scientists in their field addressing each subtopic I P Ogbuewu I C Okoli M U Iloeje General Course in Poultry Husbandry T.
