Perry, 2008-10-31 The economic successes of China and India are viewed with admiration but also with concern because of the effects that the growth of these Asian economies may have on the Latin American and Caribbean LAC region The evidence in China's and India's Challenge to Latin America indicates that certain manufacturing and service industries in some countries have been negatively affected by Chinese and Indian competition in third markets and that LAC imports from China and India have been associated with modest unemployment and adjustment costs in manufacturing industries The book also provides substantial evidence of positive aggregate effects for LAC economies associated with China's and India's greater presence in world exports financial flows and innovation Chinese and Indian growth is creating new production possibilities for LAC economies particularly in sectors that rely on natural resources and scientific knowledge Global Industrial Relations Michael J. Morley, Patrick Gunnigle, David Collings, 2006-11-22 Breaking new ground and drawing on contributions from the leading academics in the field this notable volume focuses specifically on industrial relations Informative and revealing the text provides an overview of the industrial relations systems of nine regions North America South America Western Europe Eastern Europe the Middle East Australia and New Zealand Asia Africa and India and is divided into two distinct sections covering regional variations in global industrial relations systems contemporary themes in global industrial relations Combining both systems and thematic issues this important new text is invaluable reading for postgraduates and professionals in the fields of human resources management industrial relations and business and management as well as anyone studying or interested in the issues surrounding global industrial relations **The Impact of Trade with China and India on Argentina's Manufacturing Employment** Luis Castro, Marcelo Olarreaga, Daniel

Saslavsky,2007 For many in Latin America the increasing participation of China and India in international markets is seen as a looming shadow of two mighty giants on the region s manufacturing sector Are they really mighty giants when it comes to their impact on manufacturing employment The authors attempt to answer this question by estimating the effects of trade with China and India on Argentina s industrial employment They use a dynamic econometric model and industry level data to estimate the effects of trade with China and India on the level of employment in Argentina s manufacturing sector Results suggest that trade with China and India only had a small negative effect on industrial employment even during the swift trade liberalization of the 1990s

In Defence of Labour Market Institutions J. Berg,D. Kucera,2008-02-22 Though labour market regulations have been blamed for the poor economic performance of many developing countries the evidence on which this argument rests is weak Through a survey of different labour market institutions in developing countries this book reaffirms the importance of labour market institutions in this era of globalization Empleo, ingreso y bienestar José
