Governance of Marine Fisheries and Biodiversity Conservation Serge M. Garcia, Jake Rice, Anthony Charles, 2014-07-15 Governance of Marine Fisheries and Biodiversity Conservation explores governance of the world's oceans with a focus on the impacts of two inter connected but historically separate streams of governance one for fisheries the other for biodiversity conservation Chapters most co authored by leading experts from both streams investigate the interaction of these governance streams from ecological economic social and legal perspectives with emphasis on policies institutions processes and outcomes on scales from the global to the local community and with coverage of a range of themes and regions of the world The book opens with chapters setting the historical context for the two marine governance streams and framing the book's exploration of whether as the streams increasingly interact there will be merger or collision convergence or co evolution The concluding chapter synthesizes the insights from throughout the book relative to the questions posed in the opening chapters It also draws conclusions about future needs and directions in the governance of marine fisheries and biodiversity vital to the future of the world's oceans With cutting edge chapters written by many leading international experts in fisheries management and biodiversity conservation and edited by three leading figures in this crucially important subject Governance of Marine Fisheries and Biodiversity Conservation is an essential purchase for fisheries scientists economists resource managers and policymakers and all those working in fields of biodiversity conservation marine ecology and coastal livelihoods Libraries in all universities and research establishments where environmental and or marine studies conservation ocean policy and law biological and life sciences and fisheries management are studied and taught should have copies of this most important book

Global Challenges and the Law of the Sea Marta Chantal Ribeiro, Fernando Loureiro Bastos, Tore Henriksen, 2020-05-23 This book analyses a selection of challenges in the implementation and application of the 1982 UN Convention on the Law of the Sea UNCLOS focusing on several areas international organizations fisheries security preserving marine biodiversity dispute settlement and interaction with other areas of international law UNCLOS has been described as the Constitution for the Oceans It sets out the fundamental rights obligations and jurisdictions of States regarding the access to uses and management of the oceans and seas and their resources It balances States diverse and sometimes conflicting interests such as conflicting uses of space against navigational interests and the protection of the marine environment UNCLOS is the first global treaty to include comprehensive obligations on the protection and

preservation of the marine environment including the conservation of living marine resources These are often common or cross border challenges which can only be addressed through international cooperation The book is divided into three thematic parts The first concerns the role of international organizations in ocean governance It includes twelve chapters covering a very diverse set of issues both materially and geographically that demonstrate the importance of coordinated actions on the part of multiple States for obtaining harmonized solutions regarding the pursuit of activities in maritime spaces in connection with e g navigation fisheries or maritime security The second part concerns the relevance of dispute settlement mechanisms for understanding the international law of the sea and the international legal framework within which the actions of the great maritime powers take place It is composed of three chapters examining stakeholders role in dispute settlement the position taken by China and the Russian Federation regarding international litigation in maritime spaces and how the South China Sea Award may be relevant to the debate on the international legal concepts of rock and island In turn the third part addresses current discussions on the conservation and sustainable use of marine biological diversity of areas beyond national jurisdiction Its seven chapters report on the status quo of the ongoing negotiations for a new international legal regime of the high seas and the establishment and operationalization of environmental regimes for international maritime spaces

The Development of the Law of the Sea Convention Øystein Jensen, 2020-08-28 The UN Convention on the Law of the Sea UNCLOS entered into force in November 1994 This insightful book offers in depth appraisals of the contributions of jurisprudence to this major achievement of international law tracing the impact that courts and tribunals have had on the development and clarification of various provisions of UNCLOS over the past quarter century

Governing Sustainable Seafood Simon Bush, Peter Oosterveer, 2019-01-08 Taking a social science approach this book explores the governance of sustainable seafood which is fundamental to food and nutrition security as well as being an important source of income and employment in many regions Due to the importance of protein and other fishery and aquaculture by products many wild fisheries are coming under pressure and this increasing demand has created a strong driver to expand aquaculture As a result the social and environmental sustainability of these production systems have come into question The authors of the book explore the governance of sustainable seafood taking into account the rise of social movements through environmental non governmental organisations the nature and perceived limits of government regulation within and beyond the state and the promise of market based approaches to governance such as ecolabelling The book focuses on how concern over sustainable seafood has been translated into different current forms of governance It then assesses what alternative governance approaches are starting to emerge that combine movements states and markets for sustainable seafood production and consumption and their effects The book concludes with a vision for the future through key principles for evaluating the collective impact of governing sustainable seafood This timely volume will be key reading for researchers interested in fisheries and aquaculture governance as well as coastal and marine policies and sustainable food

movements more broadly It will also be of interest to practitioners and policymakers engaged in creating fishery policies and sustainable fishery development
