Sea Island Roots African Presence In The Carolinas And Georgia:

Sea Island Roots Mary Arnold Twining, Keith E. Baird, 1988 *The African Presence in Black America* Jacob U. Gordon, 2004 Accepting the basic premise that Africa is the ancestral homeland of black Americans raises questions as to how much if any of African cultural heritage remains within that community Some claim that the severity of the plantation system and the acculturation process of the slaves could not have left any Africanism in the New World while others argue that African cultural heritage can still be seen today in many aspects of American life and thought This volume revisits the debate examining the ways in which this alleged cultural heritage manifests itself *Low Country Gullah Culture, Special Resource Study*, 2003 *The Gullah People and Their African Heritage* William S. Pollitzer, 2005-11-01 The Gullah people are one of our most distinctive cultural groups Isolated off the South Carolina Georgia coast for nearly three centuries the native black population of the Sea Islands has developed a vibrant way of life that remains in many ways as African as it is American This landmark volume tells a multifaceted story of this venerable society emphasizing its roots in Africa its unique imprint on America and current threats to its survival With a keen sense of the limits to establishing origins and tracing adaptations William S Pollitzer discusses such aspects of Gullah history and culture as language religion family and social relationships music folklore trades and skills and arts and crafts Readers will learn of the indigo and rice growing skills that slaves taught to their masters the echoes of an African past that are woven into baskets and stitched into quilts the forms and phrasings that identify Gullah speech and much more Pollitzer also presents a wealth of data on blood composition bone structure disease and other biological factors This research not only underscores ongoing health challenges to the Gullah people but also helps to highlight their complex ties to various African peoples Drawing on fields from archaeology and anthropology to linguistics and medicine *The Gullah People and Their African Heritage* celebrates a remarkable people and calls on us to help protect their irreplaceable culture **Gullah Geechee Muslims in America** Muhammad Fraser-Rahim, 2024-12-15 Through meticulous research interviews and documentation *Gullah Geechee Muslims in America Exploring Islamic Identity in the African Diaspora* presents a unique and significant contribution to religious studies Africana studies and anthropology by shedding light on a previously understudied aspect of the Gullah Geechee community and culture Previous studies of enslaved African Muslims have claimed that Islam as a conscious practice vanished by the eve of the Civil War However Muhammad Fraser Rahim highlights the continuity of Islamic belief and practice in the Lowcountry For scholars who have spent decades researching the retention of African culture among the enslaved and their descendants this book reveals certain challenges and poses new avenues of research **The Claims of Kinfolk** Dylan C. Penningroth, 2004-07-21 In *The Claims of Kinfolk* Dylan Penningroth uncovers an extensive informal economy of property ownership among slaves and sheds new light on African American family and community life from the heyday of plantation slavery to the freedom generation of the 1870s By focusing on relationships among blacks as well as on the more familiar

struggles between the races Penningroth exposes a dynamic process of community and family definition He also includes a comparative analysis of slavery and slave property ownership along the Gold Coast in West Africa revealing significant differences between the African and American contexts Property ownership was widespread among slaves across the antebellum South as slaves seized the small opportunities for ownership permitted by their masters While there was no legal framework to protect or even recognize slaves property rights an informal system of acknowledgment recognized by both blacks and whites enabled slaves to mark the boundaries of possession In turn property ownership and the negotiations it entailed influenced and shaped kinship and community ties Enriching common notions of slave life Penningroth reveals how property ownership engendered conflict as well as solidarity within black families and communities Moreover he demonstrates that property had less to do with individual legal rights than with constantly negotiated extralegal social ties

Exchanging Our Country Marks Michael A. Gomez, 2000-11-09 The transatlantic slave trade brought individuals from diverse African regions and cultures to a common destiny in the American South In this comprehensive study Michael Gomez establishes tangible links between the African American community and its African origins and traces the process by which African populations exchanged their distinct ethnic identities for one defined primarily by the conception of race He examines transformations in the politics social structures and religions of slave populations through 1830 by which time the contours of a new African American identity had begun to emerge After discussing specific ethnic groups in Africa Gomez follows their movement to North America where they tended to be amassed in recognizable concentrations within individual colonies and later states For this reason he argues it is possible to identify particular ethnic cultural influences and ensuing social formations that heretofore have been considered unrecoverable Using sources pertaining to the African continent as well as runaway slave advertisements ex slave narratives and folklore Gomez reveals concrete and specific links between particular African populations and their North American progeny thereby shedding new light on subsequent African American social formation

Speaking American Richard W. Bailey, 2012-01-23 *Speaking American* shows what the English language looked like from various points on the American continent at crucial points in its linguistic history **Reading**

Africa into American Literature Keith Cartwright, 2021-12-14 The literature often considered the most American is rooted not only in European and Western culture but also in African and American Creole cultures Keith Cartwright places the literary texts of such noted authors as George Washington Cable W E B DuBois Alex Haley Zora Neale Hurston Ralph Ellison William Faulkner Joel Chandler Harris Herman Melville Toni Morrison and many others in the context of the history spiritual traditions folklore music linguistics and politics out of which they were written Cartwright grounds his study of American writings in texts from the Senegambian Old Mali region of Africa Reading epics fables and gothic tales from the crossroads of this region and the American South he reveals that America's foundational African presence along with a complex set of reactions to it is an integral but unacknowledged source of the national culture identity and literature **Racism in the**

United States Meyer Weinberg, 1990-05-21 This volume represents the most comprehensive book length bibliography on the subject of racism available in the United States Compiler Meyer Weinberg has surveyed a wide ranging group of material and classified it under 87 subject headings drawing on articles books congressional hearings and reports theses and dissertations research reports and investigative journalism Historical references cover the long history of racism while the heightened awareness and activity of the recent past is also addressed in detail In addition to works that fit the narrow definition of racism as a mode of oppression or group denial of rights based on color Weinberg includes references dealing with sexism antisemitism economic exploitation and similar forms of dehumanization References are grouped under a series of subject headings that include Civil Rights Desegregation Housing Socialism and Racism Unemployment and Violence against Minorities Items which do not have self explanatory titles are annotated and virtually every section is thoroughly cross referenced Also included is one section of carefully selected references on racism in countries other than the United States Unlike the remainder of the book this section is not comprehensive but rather provides an opportunity to view racism comparatively The volume concludes with an author index This work will be a significant addition to both academic and public libraries as well as an important resource for courses in racism sociology and black history
